# VOTE: 151 Uganda Blood Transfusion Service (UBTS)

Quarter 2

## Performance highlights for the Quarter

1. Collected 109,719 units of whole blood against 115,000 units planned target of whole blood through out the country
2. Issued 107,019 units of whole blood against 103,500units of whole blood to 625 health transfusing facilities in the country
3. Provided information on blood stocks in various blood banks and centres on daily basis to transfusing health facilities
4. Undertook training and capacity building of staff in appropriate clinical use of blood and blood products in selected transfusing facilities
5. Undertook planning and budgeting for blood transfusion services for all the Regional Blood Banks
6. Carried out monitoring and evaluation of blood operation activities in all the Regional Blood Banks
7. Initiated procurement of some medical equipment

## Variances and Challenges

1. Delays in recruitment processes by Ministry of Public Service, Ministry of Health and Health Service Commission leading to lack of staff to fully operationalized new Regional Blood Banks and non absorption of wage amounting to Ugx 3.254bn.
2. Frequent break down of aged blood collection vehicles
3. Delays in blood processing due to lack of insufficient reagents laboratories
4. Sale of blood in hospitals
5. Inadequate budget for medical supplies and reagents under the National Medical Stores

Quarter 2

## Performance highlights for the Quarter

The Authority conducted and issued 22 performance audit reports covering a sample of 276 procurements valued at UGX 465,032,190,087.
Conducted 22 on-spot compliance assessments
Undertook 11 bid preparatory audits the Authority undertook 64 bid preparatory audits to establish whether public procurement planning and requisition was conducted in a manner which promotes transparency, accountability and fairness in accordance with the PPDA Act.

Reviewed 25 on-going contracts
the Authority conducted 13 investigations into mismanagement of procurement and disposal processes and issued 11 reports. The average investigation lead-time was 22 working days.
13,745 contracts for supplies, works and services were awarded amounting to UGX 1,162 Bn. Of the total contracts awarded, 12,877 contracts (62.09%) worth UGX 721 Bn were awarded to local providers while 138 contracts (representing 36.49%) worth 424Bn were awarded to foreign providers. In the period being reported, a total of 730 contracts (1.43%) worth 16Bn were awarded to Special Interest Groups.
100 new enterprises were registered on the special interest groups register, bringing the total number of registered associations of Women, Youth, and PWDs enterprises to 334.
the Authority handled nine applications for accreditations, of which six were new requests and 3 were requests for renewal of the accreditations.
The Authority reviewed and approved five (5) applications for deviations from SBDs, procedural forms, and contract documents.
Five suspension matters were investigated and closed during the quarter, while 12 matters are pending determination.
3,076 participants were trained in various aspects of the procurement and disposal system. The capacity building engagements are anticipated to result into increased compliance to PPDA law.
3,094 providers were served by the Register of provider of which 1,053 were new registrations and 2,003 were renewal of existing profiles.

## Variances and Challenges

Limited audit coverage. The Authority currently conducts audits on a sample and risk basis. The current audit coverage is only 35% and this position is continuously being worsened by the ever-increasing number of both central and Local Government Entities.
Old fleet of vehicles yet most of the PPDA activities are field-based. This implies that the Authority is not able to send multiple teams to the field to implement the planned activities.
Delayed payments to providers as a result of delayed receipt of funds and non-realization of expected funds disbursement among PDEs;
Non-implementation of the procurement plans among PDEs, partly attributed to non-realization of entity budgets;
High value projects are implemented mainly by foreign providers, leading to low proportion of contracts by value awarded to local providers;

# VOTE: 154 Uganda National Bureau of Standards (UNBS)

Quarter 2

## Performance highlights for the Quarter

A total of 1,875 inspections were done in Q2 against a target of 1,417 inspections for the Quarter spanning over 72 districts across the country indicating 132.41% achievement of the target. This is attributed to the resources availed to the department for the Quarter. In addition, some activities were an overflow of the Quarter 1 activities that had not been concluded.
332 Uganda Standards (US) and 130 Final Draft Uganda Standards (FDUS) were developed.
A total of 204,930 equipment were in the period under review .Of these 127,539 were weighing equipment, 511 road tankers, 137 bulk meters 0 dip sticks, 95 static tanks 3,465 fuel dispensers, 71,525 electricity meters and 1,600 pre-package control, 0 water meters and 3 railway wagons. The equipment verified were across different parts of the country namely; Kampala, Jinja, Mbarara, Mbale and Lira.
88,119 consignments inspected. The categories of products inspected include; used motor vehicles, food, mechanical material and gas appliances, chemicals, textiles and leather products electricals and electronics, plastic and rubber products, used products, automotive, furniture (wood and metal) paper and stationery products, brand new motor vehicles, cosmetics, protective and safety equipment and toys.
2,590 product and 29 system certification audits undertaken issuing 1,679 product and no system permits. 12 stakeholder engagements conducted with various stakeholders to sensitise them on Import Inspection procedures to bridge the information gap and foster self-regulation and compliance to UNBS requirements.
7,109 product samples tested in the Chemistry, Microbiology, Electrical and Engineering Materials laboratory. The samples tested also included those from the regional laboratories in Mbale, Mbarara, and Gulu

## Variances and Challenges

Inadequate Staff. The staffing level is below the minimum required level of 1200 to implement the mandate of trade facilitation, consumer protection through boarder control and standards enforcement throughout the whole country and also effectively contribute to the growth of the economy 10 Fold. Limited Support to MSMES in line with BUBU and Industrialization Policy. The service turnaround time (4.5 Months) and cost of certification is perceived unfavourable calling for more sensitization and capacity building to improve uptake of standardization services and competitiveness of Uganda’s private sector Limited Equipment for newly constructed laboratories. UNBS operates modern Food Safety Laboratories at its Headquarters in Bweyogerere that are equipped to the tune of 60 percent. UNBS has constructed National Metrology Laboratory under the ADB funding. However, there is need to procure furniture and specialized equipment. Inadequate decentralization of UNBS Services. UNBS services at regional offices are still inadequate due to understaffing, shortage of field vehicles for daily operations in the regions. Additionally, Certification and Market Surveillance activities go hand in hand with Testing and there is inadequate specialized equipment in the laboratories in the regions for testing of product samples. Inadequate ICT Infrastructure Support. The level of automation at UNBS meant to promote online access to its services is still inadequate.

## Performance highlights for the Quarter

1. ULC titled 5,267.06 Hectares of Government Land and processed 19 titles for MDAs. (Office of the President, Ministry of Works and Transport, Moyo Town Council, Ministry of Education and Sports ( Bunyororo University), Ministry of Energy and Mineral Development. Mbarara University of Science and Technology (3) Office of the President, Ministry of Education and Sports (Kitante Hill School), Science, Technology and Innovation Secretariat, Office of the President.

2. ULC acquired and compensated 4,961.291 Hectares of Land from absentee Landlords from Ankole, Buganda, Bunyoro, Bugisu and Toro Kingdom areas through Supplementary Budget, Domestic Arrears and Normal Budget release.
Compensation was made to Church of Uganda for their Land at Kibuga, Makerere University and the Kingdom of Buganda for their Land at Kiyuni, Buwekula, Mubende District among others.

3. ULC conducted sensitizations on Government Land Inventory in the 16 cities and municipalities across the country, including Kampala, Masaka, Jinja, Lira, Gulu, Arua, Mbarara, Hoima, Masindi, Kasese, Fortportal, Mbale, Tororo, Soroti, Mubende, and Entebbe.

4. ULC collected 2.455 Bn Non-Tax revenue generated from across the country.

5. ULC processed 325 lease transactions of which 263 were approved 50 deferred and 12 rejected. Of these, 152 were for male, 40 female and 133 registered Companies lessees.

6. The commission conducted 30 Land Inspections from across the country.

7. ULC prepared and submitted all the statutory reports to the authorized MDAs

## Variances and Challenges

The Commission Received a supplementary Budget of UGX Shs108.853Bn for compensation of Church of Uganda for their Land at Kibuga, Makerere at UGX Shs 21.163Bn and the Kingdom of Buganda for their Land at Kiyuni, Buwekula, Mubende at UGX Shs 4.9Bn among others.

The workplan implementation was affected by the electioneering period, however with this completed, the Commission will embark on full workplan implementation in Quarter three.

## Performance highlights for the Quarter

A total of 1,200,636 hectares equivalent to 95% of the total Central Forest Reserve (CFR) area of 1,265,741 hectares were protected from illegal activities and encroachment across the country through forest law enforcement patrols supported by the environmental Protection Police in 16 management areas across the country (7 plantation management – Mbarara, Mafuga, Mwenge, Lendu, Opit-Abera, Katuugo, and South Busoga areas and 9 Ranges of Achwa, Karamoja, Kyoga, Lake shore, Sango Bay, South West, Muzizi, Budongo System, and West Nile); A combined total of 249 ha of CFR were freed from encroachment and restored in Q2 as follows; 50 ha in Mt Kei CFR in West Nile, 100 ha in Atigo, Akileng, and Nile Bank CFRs CFR in Kyoga Range, 69 ha in Nakalenga CFR in Lakeshores, 15 ha in Mubuku in South West, 15 ha in Kampala CFR in Sango Bay Range; Twenty two hectares (22 ha) of degraded CFR were restored in Kyoga range; 8 KM of CFR boundary were resurveyed in; Enyau CFR in West Nile Range (5 KM); Kampala CFR and Bunjazi CFR in Sango Bay Range with 2 KM and 1.4 KM respectively. Upto 42 pillars were installed with 25 pillars in Enyau CFR; 10 Pillars in Kampala CFR; and 7 Pillars in Bunjazi CFR; Upto 1,922 were reported to have visted ecosites in Q2 with 1,092 females and 830 females. The ecosites were visited as follows; Kaniyo Pabidi in Budongo Systems range (953 visitors); Ssese Leisure Beach and Victoria Resort in Sango Bay Range (309 visitors); Kalinzu in South West Range (641 visitors); and Najjembe in Lakeshores range (19 visitors); A total of 23 KM of firelines were constructed and maintained in Q2 as follows; 10 KM in Lokiragodo CFR in West Nile Range; 5 KM in Mafuga Plantations; and 8 KM in Opit-Abera Plantations; Upto 43,270 Kg of seed was collected by the National Tree Seed Center (NTSC) in Q2 FY 2025/26.

## Variances and Challenges

Inadequate funds for implementation of planned activities like opening and maintaining fire lines, conducting of the National Forest resources and product market survey, and publishing of the 2023 National Land cover report for Uganda. During Q2, staff morale was negatively affected given the uncertainty in regards to the mainstreaming of NFA functions within the Ministry of Water and Environment. The Acting Executive Director handed over to the Ministry of Water and Environment on 31st December. Expectations from staff include terminal benefits as processes to absorb NFA staff into the Ministry of Water and Environment are underway.

Challenges around absorption of funds continued in Q2 and this among other challenges like inadequate transport equipment affected effective forest management and protection.

Quarter 2

## Performance highlights for the Quarter

i. Timely response to operational emergencies.
ii. Collected, analyzed, and disseminated timely Intelligence.
iii. Enhanced staff welfare by improving Medicare support, introducing a variety of financial products and increasing loanable funds at the SACCO.
iv. Enhanced capacity building of staff through career development, conducting specialized & advanced trainings of employees.
v. Border security was enhanced through more deployments of personnel and motor vehicles.
vi. Purchased and deployed 09 motor vehicles.
vii. Cleared statutory obligations.
viii. Contributed towards monitoring of government projects.

## Variances and Challenges

The variation of 4.943BN under Institutional Development for Internal Security Organization was as a result of challenges encountered during the procurement process leading to delays in the acquisition of light and heavy vehicles.

The variation of 3.325 BN under Non- residential buildings -acquisition was brought about by irregularities concerning land ownership leading to delays in construction of field offices.

The variance of 0.5BN under Furniture and fittings - acquisitions was as a result of delays in the procurement process.

The variation of 1.588 BN under pension and gratuity was brought about by incomplete pension and gratuity files due to delays in obtaining information pertaining estates.

# VOTE: 159 External Security Organization (ESO)

Quarter 2

## Performance highlights for the Quarter

a. Timely and reliable intelligence collected to ensure National Security for all Ugandans.

b. Detect and counter emerging External security threats and political subversive activities.

c. Participated in activities and programs by Regional and International Organs such as the Committee of Intelligence and Security Services of Africa (CISSA), the International Conference on the Great Lakes Region (ICGLR) and the Joint Intelligence Committee (JIC- Nairobi), the Inter-Governmental Authority on Development (IGAD), African Union Support and Stabilisation Mission in Somalia (AUSSOM), and Democratic Republic of Congo (DRC) peace keeping initiatives, the Eastern Africa Fusion and Liaison Unit (EAFLU), Nile Basin Initiative (NBI), and Northern Corridor Integration Center (NCIC), etc.

d. Supported Uganda’s Foreign Policy positions and interests.

e. Supported commercial diplomatic initiatives resulting into increased Foreign Direct Investments (FDIs).

f. Supported the monitoring the activities of exported labour force, labour Companies and immigration issues.

g. Enhanced some intelligence collection components through acquisition of classified assets.

h. Re-skilled its staff in basic, advanced and specialised courses.

i. Continued to pay salaries and pensions to ESO staff and pensioners respectively.

j. ESO continued to deploy and re-deploy staff in Field stations, Foreign missions and Strategic areas of interest.

k. Continued to extend medical support to staff and their immediate family at Jumbo medical facility.

l. Provided logistical support to staff and their family inform of food supplies.

## Variances and Challenges

# VOTE: 159 External Security Organization (ESO)

Quarter 2

a) The High-raised buildings that have overtime cropped up, have dominated the area around ESO Headquarters and made it difficult to maintain Privacy and security for both staff and the facility. This coupled with inadequate office space calls for an urgent need for the construction of New ESO Headquarters, this project is currently at the Budget implementation stage with code 1838 now awaiting funds. Phase one of this project requires UGX. 31.324Bn to kick start the construction, however, the entire project cost is 77.125 Bn.

b) Rapid technological developments, coupled with emerging security threats such as Artificial Intelligence driven risks and cyber-attacks, necessitate the use of advanced and specialised ICT equipment for effective detection and response.

c). Global terrorism, trans-national organised crime such as human trafficking, smuggling and money laundering have placed increased pressure on the Organisation’s financial resources through coordination of intelligence operations across foreign and field stations.

d). Persistent conflicts with spillover effects like; high refugee influx, proliferation of small arms in the Region and the Ring states (South Sudan, Sudan, Somalia, Democratic Republic of Congo) have increased the risk of insecurity in the country.

**Table V1.3: High Unspent Balances and Over-Expenditure in the Approved Budget (Ushs Bn)**

| | | |
|---|---|---|
| ***(i) Major unspent balances*** | | |
| **Departments , Projects** | | |
| **Programme:07 Private Sector Development** | | |
| **Vote Function:01 General Administration and Support Services** | | |
| **0.208** | Bn Shs | Department : 001 Finance and Administration |
| | Reason: Unspent funds relate to outstanding bills as at quarter end, the deferred recruitment of the CEO position awaiting guidance from MoFPED, and planned activities differed for implementation in Q3. | |
| ***Items*** | | |
| **0.015** | UShs | 223005 Electricity |
| | | Reason: Outstanding electricity bills at quarter end |
| **0.024** | UShs | 221004 Recruitment Expenses |
| | | Reason: Deferred recruitment of the CEO position awaiting guidance from MoFPED |
| **0.008** | UShs | 211106 Allowances (Incl. Casuals, Temporary, sitting allowances) |
| | | Reason: Pending activities differed to Q3 |
| **0.016** | UShs | 221017 Membership dues and Subscription fees. |
| | | Reason: Membership and subscription fees scheduled for payment in Q3 and Q4 when they fall due. |
| **0.006** | UShs | 273102 Incapacity, death benefits and funeral expenses |
| | | Reason: Limited number of eligible incident cases reported during the quarter. |
| **0.128** | Bn Shs | Project : 1887 Institutional Development for Uganda Retirement Benefits Regulatory Authority |
| | Reason: Unspent funds mainly relate to an unpaid supplier invoice for furniture and fittings acquired at quarter end, as well as the acquisition of ICT equipment whose procurement process experienced delays. | |
| ***Items*** | | |
| **0.010** | UShs | 211106 Allowances (Incl. Casuals, Temporary, sitting allowances) |
| | | Reason: Unspent funds relate to procurement oversight meetings rescheduled to Q3 |
| **0.077** | UShs | 221008 Information and Communication Technology Supplies. |
| | | Reason: Procurement process for ICT equipment ongoing and at the contracting stage. |
| **0.038** | UShs | 312235 Furniture and Fittings - Acquisition |
| | | Reason: Unspent funds relate to unpaid supplier invoice for furniture and fittings acquired. |
| **Vote Function:02 Regulation and Supervision** | | |
| **0.167** | Bn Shs | Department : 001 Board Affairs |
| | Reason: Unspent funds relate to retainer fees and allowances, as the Board couldn't undertake planned activities due to lack of quorum following the discontinuation of some members by court. As a result, only two out of the seven Board directors remain in service. | |

Quarter 2

## Performance highlights for the Quarter

1) On-site (04) inspections conducted during the quarter to enhance supervision and compliance monitoring.

2) Retirement literacy strengthened by reaching 32,4921 individuals with information on retirement planning and unclaimed benefits.

3) 316 members (157 female and 159 male) sensitised on retirement planning and relevant legal framework to improve financial security and scheme compliance.

4) Service Level Agreements drafted for the Custodian Trustee and Fund Manager of the National Long-Term Savings Scheme to provide clear roles and performance expectations for effective governance.

5) Legal guidance provided to sector players on key regulatory and operational matters including treatment of benefits for deceased members reinstatement of pension payroll effective dates of licenses service agreements for informal worker social protection schemes and payment of benefits on medical grounds.

6) 140 advocates (33 female and 107 male) sensitised on the legal framework governing the retirement benefits sector improving their capacity to support compliance and member protection.

7) 105 scheme members (58 female and 47 male) sensitised on retirement planning and the applicable legal framework to support informed financial decision making.

8) Licenses assessed and renewed for 84 individual trustees 9 administrators 8 custodians 4 corporate trustees and 7 fund managers strengthening compliance and governance in the sector.

9) One new retirement benefits scheme licensed expanding sector coverage.

10) 148 trustees trained on strengthening benefits administration practices improving understanding of legal provisions operational processes and timely and accurate payment of member benefits.

11) 05 trustees supported to undertake the Trustee Certification Programme to enhance scheme governance.

## Variances and Challenges

# VOTE: 163 Uganda Retirement Benefits Regulatory Authority

Quarter 2

Variances:
Variances in implementation and expenditure (under-absorption) were primarily due to the Authority not having a CEO and fully constituted Board, pending service provider invoices at quarter end and activities rescheduled to the subsequent reporting periods.

Major Challenges:
- Absence of a fully constituted Board. Following a court decision that discontinued four out of the seven Board members, the Board can no longer meet the required quorum. This has substantially constrained URBRA's ability to execute planned Board activities, make strategic decisions, and provide effective oversight.

Quarter 2

**Programme:12 Human Capital Development**

Vote Function:02 General Administration and support services

**Project:1980 Institutional Development of National Council for Higher Education**

Key Service Area: 000003 Facilities and Equipment Management

**PIAP Output: 12221601 Dual training system for TVET implemented**

**Programme Intervention: 122216 Support vocational training institutions (schools, institutes and colleges) and industrialists/employers to deliver a dual training system for TVET**

| PIAP Output Indicators | Indicator Measure | Planned 2025/26 | Actuals By END Q 2 |
|---|---|---|---|
| Number of MoUs signed between employers providing work based training and training institutions | Number | 1 | 1 |
| Number of TVET trainees and graduates with acess to relevant on-going job training opportunities | Number | 100 | 50 |
| Number of TVET and University programmes earmarked for phased delivery through a dual approach | Number | 50 | 20 |

# VOTE: 164 National Council for Higher Education

Quarter 2

## Performance highlights for the Quarter

Key highlights include:
1. Accreditation of 130 programmes of study by National Council for Higher Education.
2. Undertaking training of 24 institutional owners and managers in strategic leadership and management.
3. Monitoring of 22 higher education institutions for compliance by National Council for Higher Education.
4. Training of 26 institutional and programme assessors b National Council for Higher Education.
5. Training of data collectors for the state for higher education survey and tracer study by National Council for Higher Education.
6. Developed 4 minimum standards forb courses of study by National Council for Higher Education.
7 . Equation of 105 foreign qualification and recognition of 42 local qualifications by National Council for Higher Education.

## Variances and Challenges

1. National Council for Higher Education faces logistical challenges as the Council has only three field vehicles to handle 258 higher education institutions across the country.
2. Lack funds to complete the infrastructure project which exposes Council to litigation, high cost of the project as a result of delay in project completion.
3. Understaffing, as the Council has 74 staff against the approved structure of 125 staff which is 49.2% below the government recommended staffing level of 65%.
4. Limitation of the current Universities and Other Tertiary Institutions Act, Cap. 262 which cannot allow full and quick implementation of NCHE mandate.

## Quarter 2: Outputs and Expenditure in the Quarter

| Outputs Planned in Quarter | Actual Outputs Achieved in Quarter | Reasons for Variation in performance |
|---|---|---|
| **Programme:12 Human Capital Development** | | |
| **Vote Function:01 Higher Education Quality, Standard and Accreditation** | | |
| *Departments* | | |
| **Department:001 Quality Assurance and Accreditation** | | |
| **Key Service Area:320035 Quality, Standard and Accreditation** | | |
| **PIAP Output: 12020401 Employer-led TVET and Higher Education skilling and training enhanced.** | | |
| **Programme Intervention: 122212 Equip TVET trainees and higher education graduates with 21st century knowledge and skills** | | |
| 10 Applications for institutional accreditation and licencing reviewed from higher education institutions by National Council for Higher Education | 8 Applications for institutional accreditation and licensing were reviewed from higher education institutions by the National Council for Higher Education. | There was a variance of 2 (two) applications submitted. This was because the applications were incomplete and an action was required from the institutions. |
| 25 Higher Education Institutional managers and owners of higher education institutions trained in governance and strategic leadership | 24 Higher Education Instititutional Managers and owners of higher education institutions trained in institutional governance and strategic leadership. | Underperformance in training HEI managers and owners was mainly due to resource constraints, competing institutional schedules, and prioritization of critical regulatory activities, which limited the number of training sessions conducted and affected the participation during the reporting period. |

# VOTE: 164 National Council for Higher Education

Quarter 2

| Outputs Planned in Quarter | Actual Outputs Achieved in Quarter | Reasons for Variation in performance |
|---|---|---|
| **PIAP Output: 12020401 Employer-led TVET and Higher Education skilling and training enhanced.** | | |
| **Programme Intervention: 122212 Equip TVET trainees and higher education graduates with 21st century knowledge and skills** | | |
| 20 higher education institutions monitored for compliance by National Council for Higher Education | 22 higher education institutions were monitored for compliance by National Council for Higher Education. | Over-performance on monitoring of HEIs was achieved due to improved planning, adoption of risk-based and ICTT-enabled monitoring approaches, enhanced institutional cooperation, and efficient utilization of available resources, which enabled NCHE to monitor additional institutions beyond the planned target. |
| 150 Programmes from higher education institutions accredited by National Council for Higher Education | 130 programmes from higher education institutions were accredited by the National Council for Higher Education in quarter two. | Underperformance in programme accreditation was mainly due to incomplete and non-compliant submissions by HEIs, delay in addressing identified gaps, and increased stringency of accreditation standards to ensure that institutions begin to adopt the competence-based curriculum going forward. |
| 25 Institutional and programmes assessors from higher education institutions trained by National Council for Higher Education | 20 institutional and programmes assessors from higher education institutions. | Underperformance in the training of programme assessors was mainly due to resource constraints, which limited the number of participants trained as planned. |

# VOTE: 166 National Council of Sports

Quarter 2

## Performance highlights for the Quarter

- Hoima City Stadium was completed by M/S Summa and commissioned by H.E. the president of the republic of Uganda on 24th December, 2025.
- AkiiBua Stadium construction is ongoing and physical work progress stands at 36% as at 31st December, 2025.
-General administrative operations were paid in time.
- Sports activities were supported through national sports federations and associations.
-Major international sports events were supported and medals were brought to Uganda.

## Variances and Challenges

Inadequate funding for some sports activities.
Inadequate staffing in departments and units.
Some National sports federations/ associations did not meet minimum requiremnts for registration with NCS.
Delayed Financial accountability is a challenge among sports federations and associations.

| Fence, Gate, and Gatehouse renovated | Works resumed on 6th October 2025 following clearance. Physical construction progressed across Tech 1, Tech 2, guest accommodation, and reception buildings. Overall physical progress reached approximately 17.5%, in line with phased implementation targets. Supporting utilities were maintained to enable continued works. | Delays in securing statutory building permits from Mukono District due to pending land title documentation and boundary opening reports. |
| Concepts for development of 2 Aerospace prototypes initiated and approved | A two-day innovators' workshop was conducted at EDIC Rwebitete to assess infrastructure readiness, refine onboarding requirements, and align innovation projects with available aerospace R&D facilities. Project profiles were reviewed and validated, and preparations for procurement of the AEROSTAT system; a strategic aerospace R&D platform were advanced in line with the approved workplan | Alignment of innovators' technical requirements with existing infrastructure and lengthy internal approval processes. |
| Engagements on satellite data sharing with 4 African countries (Eqygt, South Africa, Kenya, Namibia) conducted | "Installation of the 7.5-metre S/X-Band Low Earth Orbit (LEO) Earth Observation Antenna System was completed, and Site Acceptance Testing (SAT) commenced.<br>The S-Band (2–4 GHz) and X-Band (8–12 GHz) frequency ranges enable reception of high-resolution Earth observation data, telemetry, tracking, and command signals from multiple LEO satellites.<br>This antenna system strengthens national research and development capacity by enabling satellite data acquisition for applications in climate monitoring, environmental management, disaster risk reduction, geospatial analytics, and advanced aerospace engineering research.<br>Regional engagements were conducted to support satellite data-sharing partnerships and collaborative research initiatives." | Coordination of testing schedules prior to commissioning and pending ISO certification and UCC operational authorization |

| Space Centre master plan and a Space Centre business model developed | Regulatory Impact Assessment (RIA) commenced, baseline data collected, and preparatory work for the Financial Certificate of Implication initiated. National Space Policy and Space Bill were submitted for guidance, with a directive issued for Cabinet presentation. Targeted stakeholder engagements were carried out to inform policy validation and institutional alignment. | Limited availability of consolidated baseline data and extended coordination timelines across multiple stakeholders. |
| Stakeholder engagments for the national human capital development stragegy in aerospace conducted | Preparatory activities for satellite design phase training done. Stakeholder engagements were carried out to inform development of a national human capital strategy aligned to aerospace engineering, satellite systems, and space science research priorities. | Dependency on full readiness of ICT and network infrastructure for commencement of advanced design-phase training. |

# VOTE: 167 Science, Technology and Innovation

Quarter 2

| Outputs Planned in Quarter | Actual Outputs Achieved in Quarter | Reasons for Variation in performance |
|---|---|---|
| **PIAP Output: 13313107 Reverse engineered products** | | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | | |
| 50 engineering professionals trained in production engineering operations | Developed an integrated framework for a 30-Day Tier Programme [Engineering Development and Innovation Centre (EDiC) Educational Bootcamp] for the Smart Manufacturing Centre | Operationalisation of tailored Engineering Development and Innovation Centre (EDiC) Educational Bootcamps are scheduled to commence in Q3 |
| Stakeholder engagements of the Innovation Driven Enterprises held | Integrated Support provided to 5 IDEs | Inadequate funds to support group-owned IDEs |
| 1 reverse engineered product launched | Designed and produced five reverse-engineered products in support of Innovation-Driven Enterprises (IDEs), including an 8 HP chaff cutter, plate roller machine, 1,000-litre milk pasteurizer, steam-fired boiler, and biomass burner, and completed integrated designs for the Uganda hospital bed prototype.<br>i) Designed and fabricated a curved steel plate rolling machine for industrial applications, with a 2.5-meter working length, an 8-mm rolling capacity, and a variable speed ratio of 1:65. The machine processes mild steel and stainless steel plates and is used to form cylindrical and circular shapes, manufacture fuel pipelines, produce industrial ducts, and roll fuel storage tanks for the petroleum industry.<br>ii) Manufactured a fully assembled milk pasteurizer with a 5,000-litre batch capacity, operating up to 95°C and cooling to 45°C for pasteurization within two to three hours per batch. The system adds value to raw milk through yoghurt production in support of Innovation-Driven Enterpris | Paused the production of the Crucibles for the Medium Foundry to the inadequacy of the requisite funds. This is scheduled for Q3 |
| Ugx 1 bn revenue generated from reverse engineered products | Ugx 6,775,834 generated from reverse-engineered products and components – Impeller Mold, Rollers, 8HP Chaff Cutter, Sprocket, & Briquette Screw | The income generation of the Centre has not yet picked up to the expected level because the centre has just started these operations and marketing and promotion is ongoing |

| Stakeholder needs of key manufacturing segments for import substitution established | Field survey of the leather sector carried out in four (4) districts including Kampala, Wakiso, Mukono, Jinja and Busia; nine (9) enterprises and three (3) training institutions were visited to understand the operations and potential of leather working businesses. Through this activity, the technologies that the leather product manufacturers use, their production capacities, the market potential of leather manufacturing businesses, and existing challenges established. The largest leather working business has a production of 60 pairs of shoes per day and 23 employees and the smallest production unit of two (2) employees using manual hand cutting tools and a basic stitching machine produces one (1) pair of shoes and two (2) leather belts per day. | On track |

**Department:003 Industry 4.0+**

**Key Service Area:370002 Technology and Innovation**

# VOTE: 167 Science, Technology and Innovation

Quarter 2

| Outputs Planned in Quarter | Actual Outputs Achieved in Quarter | Reasons for Variation in performance |
|---|---|---|
| **PIAP Output: 13313103 Industry 4.0+ Technologies (IoT, Controllers, Enterprise Software, Sensors, robotics, additive manufacturing) developed** | | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | | |
| Key production equipment for Electronics Manufacturing installed | Supplier benchmarking was completed and the most suitable hardware supplier was selected. Procurement contracts were concluded, and orders for the key production equipment were placed. The suppliers are currently within their manufacturing and preparation lead time, and delivery of the machinery is pending. | None |
| Local electronics casing and packaging line procured | An MoU to establish a sensor manufacturing facility at EDIC, Namanve was submitted as part of efforts to strengthen local electronics manufacturing capacity. In parallel, engagements were held with multiple equipment suppliers to assess options for the local electronics casing and packaging line. Equipment specifications were narrowed down, inspections of existing packaging lines were conducted to confirm technical suitability, and the procurement process for the casing and packaging line was initiated. | On track |
| Equipment for the sensor manufacturing facility installed | Submitted MoU to Solicitor General for review and clearing to establish sensor manufacturing facility at the Engineering Development and Innovation Centre (EDiC), Namanve | Waiting the clearing of the MoU by Solicitor General |
| Equipment for the Local Programmable Automation Controllers (PAC) Manufcaturing facility installed | Equipment for the Local Programmable Automation Controllers Procured. Shipping of equipment to Uganda has commenced | On track |
| Equipment and inputs for the State-of-the-art Carbon Access Lab installed | | |
| | During Quarter 2, the Carbon Origination Platform was procured, deployed on the national sovereign cloud, and officially launched during COP in Brazil. The platform is fully operational and accessible via pearlcarbon.africa, where it is actively being used to originate and manage carbon projects. Ugandan carbon projects have been onboarded and are currently utilizing the platform for ongoing project development and management. | A key challenge in Q2 was delayed payment to the ICT supplier, which affected timelines for some support and follow-up activities related to the platform rollout. |

# VOTE: 167 Science, Technology and Innovation

Quarter 2

| Outputs Planned in Quarter | Actual Outputs Achieved in Quarter | Reasons for Variation in performance |
|---|---|---|
| **PIAP Output: 13313103 Industry 4.0+ Technologies (IoT, Controllers, Enterprise Software, Sensors, robotics, additive manufacturing) developed** | | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | | |
| High performance computer, GPUs, storage equipment installed | Detailed technical requirements for the high-performance computing infrastructure, including GPUs and storage systems, were defined. In addition, a sustainability and reliability plan was developed to ensure stable operation and long-term use of the compute resources. Based on these preparations, the procurement process for the HPC, GPU, and storage equipment was initiated. | On track |
| Hardware for the cloud infrastructure installed | Cloud servers, network switches, and firewalls were procured and successfully preconfigured in Europe. All equipment was shipped to Uganda and is currently undergoing customs clearance. In parallel, colocation space and cross-connects at Raxio were secured in preparation for deployment. | A key challenge was the denial of tax exemption, which has delayed customs clearance and installation of the cloud infrastructure hardware. |
| Developed systems tested within the MDAs | Following the presentation of the Unified Immigration and Border Control Platform demo to the NCIC and the Ministry of Internal Affairs, the system is now awaiting a pilot rollout at border points for final validation.<br><br>Additionally, development has commenced on two new systems, with needs assessments and technical specifications currently underway:<br>1. A Diaspora Registry Portal: Designed to facilitate the reintegration of diaspora talent into the local STI ecosystem.<br>2. A B2G Flight Procurement Platform: Aimed at enforcing mandatory competitive bidding for flight pricing among local travel agencies. | On track |
| Challenge Based Hackathons held | A challenge-based hackathon was successfully conducted alongside a university roadshow to mobilize and onboard participants. The initiative engaged over 700 participants from universities and the innovation ecosystem. Winning teams were awarded cloud credits on the national sovereign cloud to support continued development and deployment of their solutions. | On track |

| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | | |
| 2 Industry 4.0+ products in climate technology, deep technology and local electronics commercialised | Ten new hardware products were designed and prototyped, with injection moulds initiated for locally manufactured calculators and hair dryers, alongside contract manufacturing partnerships for plastics and PCB production. The electronics prototyping and fabrication facility was upgraded to enhance safety and productivity, while over 100 students and innovators were trained through Industry 4.0+ programmes in electronics, PCB design, IoT, and AI. Strategic MoUs were executed with multiple academic and private-sector partners, and Uganda's innovation capacity was promoted through participation in regional and international technology forums, advancing commercialization, technology transfer, and local manufacturing readiness. | High cost and long lead times for specialized components and tooling, particularly injection moulds and precision electronics parts, affecting timelines for local manufacturing |
| 4 scientists and engineers trained in Industry 4.0+ and emerging technologies and 1 hardware startups incubated through the Hardware Design & Incubation Lab | During Quarter 2, capacity building and incubation activities progressed under the Industry 4.0+ and emerging technologies agenda. A total of 30 innovators and startups were selected into the AI Innovation Academy following a competitive process, while three mature AI health startups were incubated under Pathogen Economy Labs. The programme is currently supporting the development and advancement of three key digital products: a Cervical Cancer Screening Platform, a Tuberculosis Screening Platform, and an AI4Health Dataset Repository, strengthening local capability in advanced technology development and commercialization. | On track |
| Technology Transfer Framework drafted and aligned with University IP laws | Regional Universities Forum for Capacity Building in Agriculture (RUFORUM) was identified as - following the success of the Commercialization of Academic Research Initiative (CARI) that was active between 2023 - 2025 | Not on track due to delay of discussions around the modalities of work with other institutions |

| **Department:005 Export-Targeted STI** | | |
| **Key Service Area:370005 Model Value Addition Services** | | |
| **PIAP Output: 13313106 Technology for value addition to minerals and other materials; biofuels; nanomaterials; renewable energy technologies; fabricated machinery and equipment** | | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | | |
| Technical assistance extended to stakeholders to define product requirements and specification | Frameworks were approved by SG, teams are ready awaiting funding clearance to commence work activities. Design and planning activities continuing but limited. This is a never before funded project and lacks the resources to progress without funding. | Low availability of funding coupled with approval priority challenges |
| Production setup for production prototyping done | Progress continuing, project reached the technical milestone of lamination blanking after several months of technical challenges. project budget utilised 90% | Inadequate access to manufacturing infrastructure limiting project progress and participation. Government has to review policies on infrastructure utilisation and access to limit expenses on additional infrastructure on top of underutilised existing infrastructure. |

# VOTE: 167 Science, Technology and Innovation

Quarter 2

| Outputs Planned in Quarter | Actual Outputs Achieved in Quarter | Reasons for Variation in performance |
|---|---|---|
| **PIAP Output: 13313106 Technology for value addition to minerals and other materials; biofuels; nanomaterials; renewable energy technologies; fabricated machinery and equipment** | | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | | |
| Stakeholder engagements conducted on water filtration technology | Frameworks were approved by SG, teams are ready awaiting funding clearance to resume work activities. This project was funded before, and has a prototype that needs to re-engineered to filter sizeable volume of water flow, as required for commercial uses. | Industrial collaboration for needs assessment and knowledge transfer required. Fabrication focus that meets international standards required. |
| Technical guidence extended to stakeholders to enable Assembly of pump prototype | Framework to fund the project is required, teams are ready awaiting funding clearance to resume work activities. This project was funded before, and has a prototype that needs to re-engineered to solve the past challenges experienced at the pilots. | Project lacks funding for continuation. |
| Personel trained on geothermal direct-use development technologies | This project is ongoing under MEMD, DGSM, with preparations for creating access roads, compensation, and planning for deep drilling for direct heat use and electricity generation. And offers a platform for technology transfer. | Low interaction with team, more effort required to use technology transfer opportunity for capacity building, remote work site in Panyimur. |
| Experiments conducted (Optimised pellet size and process parameters) | The project set up a dedicated site for installation of the lab scale fluidised reactor and on the last visit was awaiting the technology supplier to install and commission the plant. A site for fabricating the designed fluidised bed reactor was identified at Kireka and the team has the necessary resources to commence the fabrication. Their budget utilisation was at ~98% with the balance intended for import of some materials. | Lack of access to manufacturing infrastructure services delayed many stages of the project. |
| Technical assistance extended for Design of the product | Framework to fund the project is required, teams are ready awaiting funding clearance to resume work activities. Innovators continued to struggle with limited resources to develop production capacity from knowledge sharing with STI-OP | Funding delays at upstream value chain stages limits productivity at the downstream stages. |

| Stakeholder engagements and coordination undertaken and Road design and drainage plan developed | This project was funded, they identified a road in Kiira Municipality and a professional team to translate the research to actual application. Commencement of works in expected in the third quarter. | Team composition delays were resolved, infrastructure access guidance with EDIC given |
| Testing of Battery grade material trial samples conducted | This project is ongoing at Busitema University, 100% of the budget was consumed, equipment was procured and additional space is required to install them. | Lack of space for some of the equipment, however University promised due space limitations to allocate space as when equipment would be procured. |
| Locally developed crushing and grinding technology developed | The frameworks were completed and the project is expected to begin within the third quarter, with additional support on aspects of the project that required expertise that was outside the scope of the project, especially on the deep core drilling and industrial machinery fabrication. | Lack of resources and access to infrastructure to develop industrial technology for imports substitution |

| **PIAP Output: 13313107 Reverse engineered products** | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | |
| 200 engineering professionals trained in production engineering operations | The TIER (Technology Innovation and Entrepreneurship Accelerator) Programme was piloted, including an Orientation and Mindset Reset Boot Camp that trained 76 engineering professionals from five universities and two technical colleges. Of these, 20 participants were absorbed into Hima Cement Ltd's hands-on engineering recruitment framework, and an integrated framework for a 30-day TIER Programme (EDiC Educational Bootcamp) for the Smart Manufacturing Centre was developed. |
| One (1) industrial cluster formed with Innovation-Driven Enterprises (IDEs) | The Engineering Development and Innovation Centre (EDiC) Idea-to-Market Journey for developing and incubating IDEs was defined, and integrated support was successfully provided to five IDEs. |
| Three (3) reverse engineered products on the market | Market assessments for the hospital bed and chaff cutter were completed, and two chaff cutters (10 HP and 16 HP) were successfully reverse engineered. In support of Innovation-Driven Enterprises (IDEs), five priority products were designed and produced through reverse engineering, including an 8 HP chaff cutter, curved steel plate rolling machine, milk pasteurizer, vertical steam-fired boiler, and biomass burner, alongside completion of integrated designs for a Uganda hospital bed prototype. |
| Revenue of Ugx 4 bn generated from reverse engineered products | A total of UGX 67,325,834 was generated from reverse-engineered products and precision components, primarily gears and rollers, serving as a foundational market penetration platform. |

| **PIAP Output: 13313107 Reverse engineered products** | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | |
| Framework for Development of Partnership and Offtake Agreements for Key Manufacturing Segments for Import Substitution developed | Through engagements with the leather actors in Q1 and Q2 activities, progress has been made in understanding the landscape of the leather sector in terms of the leather goods manufacture and skills training in leather working. It has been established that workers in the small scale leather working business in various locations in the Kampala, Wakiso and Mukono areas do not have formal training in leather working and yet the leather training programmes at Kyambogo University, MTAC Management Institute and Vision for Africa have low (below 5 students) enrolment in the leather training programmes. Additionally, the training institutions do not have the standard leather working equipment for training but instead improvise with manual tools. Furthermore, the leather working business are typically working in confined spaces with poor occupational health and safety conditions. |
| Technology needs of key manufacturing segments targeting import substitution established | Through stakeholder engagement in Q1 and the field survey in Q2, the technology needs and the training needs of the leather sector actors involved in footwear manufacture were identified. The profile of leather working technologies for establishment of a state-of-the-art leather facility to support leather working business and for skills development in leather working has been developed. It has been established that there are a large number of small scale leather working business in various locations in the Kampala, Wakiso and Mukono areas who are using manual hand tools and basic machinery for their operations. This may require establishment of multiple shared leather working facilities in different locations within Kampala metropolitan area to improve the performance and contribution of leather working businesses to the economy. |
| Sales and marketing support provided to key manufacturing segments targeting import substitution | NA |

| | |
|---|---|
| Electronics Manufacturing Facility with manufacturing capacity of 100,000 units per year operationalised | In Q1, procurement of equipment and inputs for the Electronics Manufacturing Facility commenced. In Q2, this was advanced through detailed benchmarking of suppliers, selection of the preferred supplier, and placement of orders for the key production equipment. The project is now awaiting delivery of the equipment in line with the agreed lead times. |
| Local electronics casing and packaging line established | Progress was made toward strengthening local electronics manufacturing capacity. In Q2, an MoU to establish a sensor manufacturing facility at EDIC, Namanve was submitted, alongside extensive engagements with equipment suppliers for the local electronics casing and packaging line. Equipment specifications were refined, existing packaging lines were inspected to validate technical suitability, and the procurement process for the casing and packaging line was initiated |
| Sensor manufacturing facility established | Submitted MoU to Solicitor General for review and clearing to establish sensor manufacturing facility at the Engineering Development and Innovation Centre (EDiC), Namanve |
| Local Programmable Automation Controllers (PAC) Manufacturing facility established | Equipment for the Local Programmable Automation Controllers Procured. Shipping of equipment to Uganda has commenced |
| State-of-the-art Carbon Access Lab set-up | NA |

# VOTE: 167 Science, Technology and Innovation

Quarter 2

| Annual Planned Outputs | Cumulative Outputs Achieved by End of Quarter |
|---|---|
| **PIAP Output: 13313103 Industry 4.0+ Technologies (IoT, Controllers, Enterprise Software, Sensors, robotics, additive manufacturing) developed** | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | |
| Local Carbon Origination Platform established | Across Q1 and Q2, a comprehensive needs assessment for the Carbon Origination Platform was completed, followed by development and review to ensure alignment with defined requirements. The platform was subsequently procured, deployed on the national sovereign cloud, and officially launched during COP in Brazil. It is now fully operational and accessible via pearlcarbon.africa, with Ugandan carbon projects onboarded and actively using the platform for project origination and management. |
| AI studio set-up | The AI Studio was constituted and the procurement process for high-performance computing infrastructure was initiated. This included defining detailed technical requirements for HPC, GPUs, and storage equipment, developing a sustainability and reliability plan for operating the compute infrastructure, and formally commencing procurement processes toward acquisition and deployment. |
| Cloud infrastructure established | The sovereign cloud infrastructure hardware was procured, preconfigured, shipped to Uganda, and deployment preparations completed, including securing colocation facilities and connectivity at Raxio. The project is currently at the customs clearance stage prior to installation. |
| 2 locally developed E-Governance Systems adopted by Government MDAs | Two key e-governance systems recently underwent validation presentations before their respective MDAs: the Unified Immigration and Border Control Platform, presented to the Ministry of Internal Affairs, and the STI-OP One-Stop Center, presented to STI-OP. Following the successful demo of the Unified Immigration platform to both the NCIC and the Ministry, the system is now prepared for a pilot rollout at designated border points for final field validation.<br><br>Additionally, development has commenced on two new systems, with needs assessments and technical specifications currently underway:<br>1. A Diaspora Registry Portal: Designed to facilitate the reintegration of diaspora talent into the local STI ecosystem.<br>2. A B2G Flight Procurement Platform: Aimed at enforcing mandatory competitive bidding for flight pricing among local travel agencies. |

# VOTE: 167 Science, Technology and Innovation

Quarter 2

| Annual Planned Outputs | Cumulative Outputs Achieved by End of Quarter |
|---|---|
| **PIAP Output: 13313103 Industry 4.0+ Technologies (IoT, Controllers, Enterprise Software, Sensors, robotics, additive manufacturing) developed** | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | |
| Market Access, Readiness and Partnerships for the Deep Technology Ecosystem established | Preparations for ecosystem engagement activities progressed despite the rescheduling of the Uganda Deep Technology Summit to May 2025 due to the unavailability of key partners. In the interim, alternative engagement activities were implemented, including a challenge-based hackathon and a university roadshow, which successfully mobilized over 700 participants from universities and the wider innovation ecosystem and supported winning teams with sovereign cloud credits. |
| 8 Industry 4.0 products in climate technology, deep technology and local electronics commercialised | Significant progress was made in local electronics product development, manufacturing readiness, and capacity building. Two products— a hair dryer and a calculator—advanced to the standards review stage at UNBS, while a total of ten new hardware products were designed and prototyped. Injection moulds for locally manufactured calculators and hair dryers were initiated, supported by contract manufacturing partnerships for plastics and PCB production. The electronics prototyping and fabrication facility was upgraded to improve safety and productivity, over 100 students and innovators were trained through Industry 4.0+ programmes, and strategic MoUs with academic and private-sector partners strengthened commercialization, technology transfer, and Uganda's local manufacturing ecosystem. |
| 12 scientists and engineers trained in Industry 4.0 and emerging technologies and 3 hardware startups incubated through the Hardware Design & Incubation Lab | Across Q1 and Q2, a structured programme to train scientists and engineers in Industry 4.0+ was developed and launched, covering AI, embedded systems, and electronic hardware manufacturing. Implementation advanced in Q2 through capacity building and incubation activities, including the selection of 30 innovators and startups into the AI Innovation Academy and incubation of three mature AI health startups under Pathogen Economy Labs. These efforts are supporting the development of three core digital products—Cervical Cancer Screening, Tuberculosis Screening, and the AI4Health Dataset Repository—thereby strengthening local skills, innovation, and commercialization capability. |
| 10 Products arising from Academic Research ready for Commercialisation | Regional Universities Forum for Capacity Building in Agriculture (RUFORUM) was identified as - following the success of the Commercialization of Academic Research Initiative (CARI) that was active between 2023 - 2025 |

|---|---|
| 2 infrastructure innovations developed | Engagements on infrastructure access frameworks with EDIC, R&D policy development stakeholder engagement with MoDVA stressing commercialisation, competition, early human capital development focus among others. |
| Deep well water extraction technology developed | Project delivered commendable engineering skill development with using existing national infrastructure to manufacture a high precision lamination blanking die, as part of establishing the production processes required to make a deep well water pump. With the budget at 90%, planning needed for unfinished works. |
| Water filtration technology and equipment prototyping targeting heavy metal and organic matter filtration for industrial and community application developed | Laboratory testing of filtration efficacy completed, emphasis on engineering practical solution stressed for the team to translate the science of the project into marketable products and services to solve municipal potable water contamination and industrial heavy metal water contamination. |
| Precision irrigation and seasonal water management technology for water stressed agricultural and range land areas developed | Project lacked resources to progress to production process technology development, but benefited from cross project synergies with knowledge transfer on industrial design and production process development. |
| Technology development for geothermal energy technology development and prototyping for low temperature wells supported | Progress on securing grant funding for geothermal power generation from JICA. Progress on preparing sites for heavy engineering activities. Action needed on MDA collaboration especially on technology transfer for STI-OP |
| Green steel direct reduction technology development and prototyping for Ugandan iron ore using hydrogen to replace carbon reductants undertaken | All procurement processes for installation completed. New site was erected to house the equipment through an authorised viament of project funds. Fabrication services for fluidised bed reactor procured, awaiting progress report. |

# VOTE: 167 Science, Technology and Innovation

Quarter 2

| Annual Planned Outputs | Cumulative Outputs Achieved by End of Quarter |
|---|---|
| **PIAP Output: 13313106 Technology for value addition to minerals and other materials; biofuels; nanomaterials; renewable energy technologies; fabricated machinery and equipment** | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | |
| Clean electricity prime mover development to replace diesel engines used in mechanisation of small scale mining operations in Uganda undertaken | Team has designed systems and processes to deliver the technology and is show readiness for activity implementation |
| Plastic waste reuse in blended tarmac for use in paved road construction initiated | Planning processes completion and commencement planning and funding clearance completed. Team is targeting a technology demonstration to attract public financing for scaleup. |
| Electric battery storage materials developed from Ugandan mineral materials | The project team prioritised equipment procurement and the University promised to allocate space for the equipment. However there is a small delay with allocating additional space for the team to install the equipment and commence their research activities. |
| Electric gold electrowinning technology to replace mercury use in gold extraction chemical processing for small scale mining in Uganda developed | The cumulative progress was minimal impeded by the lack of drilling exploration data. The mapping of underground resources to inform optimal mining strategies limits the economic progress of this and many similar small scale mining activities. |

Quarter 2

| Annual Planned Outputs | Cumulative Outputs Achieved by End of Quarter |
|---|---|
| **PIAP Output: 13313108 Precision tools, components and industrial systems** | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | |
| 15 precision tools and parts designed within the framework of the learning factory model | Five systems and sixteen components were designed, alongside the design of a total of 22 precision tools to support human capacity development and Innovation-Driven Enterprises (IDEs). In addition, 25 precision tools were successfully produced, strengthening practical skills development and applied manufacturing support for IDEs. |
| 11 industrial components produced | Six systems were produced alongside a total of 43 industrial components, supporting applied manufacturing and IDE needs. In addition, 100 3D printer machines were designed and assembled to enable low-volume manufacturing, prototyping, and human capacity development under the Think–Design–Create framework. |
| Operational 2-Tons Foundry established | A 50 kg-per-charge mini proof-of-concept foundry was constructed and commissioned, enabling casting of multiple components and moulds, and scrap lead from batteries was successfully melted and purified. In addition, a 500 kg-per-charge foundry was designed with fabrication materials under procurement, and integrated designs for a 2-ton foundry were completed. |
| Infrastructure set-up and start-up equipment for Packaging Technology Facility established | Site preparation and infrastructure planning are ongoing, pending approval of the Master Plan. |
| Engineering projects and services provided | Civil engineering services were provided to Operation Wealth Creation (OWC), while equipment leasing and machinery rental services supported a total of 22 nascent Ugandan companies, including 13 engaged in national infrastructure projects. In addition, heavy equipment maintenance and repair services were executed for EDiC machinery and equipment. |
| 60 heavy equipment machinery and maintenance operators trained and retooled | A total of 80 heavy equipment and machinery operators were retooled and subsequently deployed to Engineering Development and Innovation Centre (EDiC) clients under equipment leasing and machinery rental operations. |
| Revenue of Ugx 15 bn generated from civil engineering projects | A total revenue of UGX 8,131,827,436 was generated from civil engineering projects, based on amounts invoiced as of 31st December 2025. |

**Key Service Area:370002 Technology and Innovation**

**PIAP Output: 13313105 Value added agro-products**

**Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains**

| | |
|---|---|
| 24 value-added agro-products on the market and 12 multi product Pilot Production facilities modified | PIBID/BIRDC is in the final stages of completing the USA Receipt from Banana Flour premixed product. Products tasting is ongoing. A 2 metric ton output Drum dryer and assorted bakery equipment received at PIBID/ BIRDC Nyaruzinga processing plant and Jinja Bakery, respectively. |
| 2 agricultural bio control products developed | Have 2 ideas identified for control of pests on crops. The other 2 neem tree pesticides are already at the stage of field testing. |
| One Freezone facility functionalized for Pilot production of Value added coffees, vegetables, fruits | The civil works modifications and set ups of key equipment is at 85% complete. Completion pending additional funding of USD 36,000 |
| 10 Coffee value-added products on the market | Launched 10 products of roasted coffee products (Beans, and ground drip, capsules and packets) from the Africa Coffee Park into the Ugandan and Somalia market. Launched 2 blends of roasted and ground coffee for Saudi Arabia Markets and one blend for USA Markets by Nonda Commodities Limited. Launched one ready to drink espresso sachets into USA and domestic markets by Great Lakes Coffee Limited. |
| One multi Coffee product Pilot Production facility functionalized | Freeze dry at 100% completion, Spray dry component at 97% completion at the Africa Coffee Park |
| 2 export grade silk products on the market | No work undertaken on this activity in Q1 & 2 |

# VOTE: 167 Science, Technology and Innovation

|---|---|
| **PIAP Output: 13313105 Value added agro-products** | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | |
| Banana flour and banana products in different types produced and marketed | As at the end of Q2, PIBID/BIRDC sold UGX 3.164 billion in sales of banana flour based products. Over 4 products commercialized. International trips to USA, South Africa and Kenya (Mombasa International Show), Brazil and the DRC undertaken to market TOOKE products. PIBID/BIRDC was visited by the DRC delegation to negotiate on the exportation of Banana Value added products |
| Halal and UNBS re-certification of TOOKE products secured and ISO certification (ISO 22000:2018) for international food safety standards obtained | ISO and UNBS recertification of TOOKE products secured |
| Designs Completed and initial works started for one Agro-Science, Tech and Industrial park. | Stake holder engagement has been done in Bustima, Muni, Gulu, Lira and MT of the Moon University Pre-feasibility study done, Two universities Busitema and Muni committed 300 Acres of land Each - Other university the process is on going. |
| Land acquired for 2 other sub regional Agro Science, Technology parks | Busitema University Council has committed land over 200 Acres for the Eastern Uganda park. 450 acres of land acquired by PIBID/BIRDC for the (Industrial Technology Park) ITP development at Nshaara, Kiruhura District. Master plan for the ITP developed for Nshaara, Kiruhura District. Muni University Council has committed 300 acres of land for the West Nile Park |
| 3 Value Chain Specific Standards developed | Value chain analysis tool has been Automated. Textile, Leather, Dairy, Fish, Poultry, Sweet Potato, Cocoa, Cassava have been identified for value chain analysis |
| Silk factory in Kween District operationalised and work for revamping the factory in Sheema District initiated in preparation for the Silk Conference in November, 2025 | No work was done on this activity in Q 1 & 2 |

**PIAP Output: 13040101 STI Policies, laws and regulations developed**

**Programme Intervention: 134113 Develop policies, laws, and regulations that govern and facilitate the national STI system**

| | |
|---|---|
| 2 STI Policies, laws, strategies and regulations developed and/or reviewed | |
| Mechanisms for nurturing and regulation of science professionals and professional bodies established and/ or implemented | The regional engagements did not take place because of a schedule of activities that included the road trip to South Africa and they are planned for Q3 |
| Accreditation Guidelines for Ethic committees updated | The 3rd Accreditation Committee for Research Ethics Committees reviewed the Guidelines for Accreditation of Research Ethics Committees and Institutional Animal Care and Use Committees from 2nd to 4th December 2025. The review aimed at aligning the accreditation guidelines with updated national guidelines and the evolving research and regulatory landscape in Uganda. The revised guidelines will provide a clear and standardized framework for the establishment, accreditation, renewal, monitoring, and revocation of RECs and IACUCs, outlining roles and responsibilities of UNCST, host institutions, and committees. |
| 240 Research projects inspected and audited for compliance | 70 R&D projects and programs inspected and audited for compliance |
| 7th National Bio-safety Committee (NBC) in place | 1) the second regulatory meeting of the 7th National Biosafety Committee, during which biosafety applications, inspection reports, and renewal requests were reviewed. 2) undertook a biosafety and biosecurity capacity building for the Uganda Cancer Institute Institutional Biosafety Committee, which strengthened oversight of high-risk biomedical research, dual-use research of concern, and emerging technologies. |
| Compendium of STI Statistics 2025 produced | The activity was not undertaken due to lack of insufficient funds. The institution experienced budget cuts amounting to UGX 4 billion across the two Quarters. |

| *Departments* | | |
| **Department:001 Aeronautics and Space Science** | | |
| **Key Service Area:370002 Technology and Innovation** | | |
| **PIAP Output: 13313104 Aeronautics and space science technologies tranferred, developed and domesticated** | | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | | |
| Phase II Refurbishment works at the Mpoma Satellite Earth Station completed and equipped | Information office, Dinning and Kitchen, and one Guest Accommodation renovated | Information office, Dinning and Kitchen, and one Guest Accommodation renovated |
| Aerospace Innovation Hub operationalised | 2 Aerospace prototypes developed | 2 Aerospace prototypes developed |
| Ground Station operationalised and Internationally Certified | Defunct antennas at Mpoma assessed | Defunct antennas at Mpoma assessed |
| An approved sector regulatory framework | Regulatory framework and business model developed and approved | Regulatory framework and business model developed and approved |
| 10 experts across industry and academia trained in space science and a national human capital strategy for aerospace designed | National human capital stratgegy for aerospace developed | National human capital stratgegy for aerospace developed |
| **Department:002 Import Substitution** | | |

# VOTE: 167 Science, Technology and Innovation

Quarter 2

| Annual Plans | Quarter's Plan | Revised Plans |
|---|---|---|
| **Key Service Area:370002 Technology and Innovation** | | |
| **PIAP Output: 13313107 Reverse engineered products** | | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | | |
| 200 engineering professionals trained in production engineering operations | 50 engineering professionals trained in production engineering operations | 50 engineering professionals trained in production engineering operations |
| One (1) industrial cluster formed with Innovation-Driven Enterprises (IDEs) | Needs assessment of the Innovation Driven Enterprises, that will inform cluster formation, conducted | Needs assessment of the Innovation Driven Enterprises, that will inform cluster formation, conducted |
| Three (3) reverse engineered products on the market | 1 reverse engineered product launched | 1 reverse engineered product launched |
| Revenue of Ugx 4 bn generated from reverse engineered products | Ugx 1 bn revenue generated from reverse engineered products | Ugx 1 bn revenue generated from reverse engineered products |
| **Key Service Area:370004 Industrial Skills Development** | | |
| **PIAP Output: 13313107 Reverse engineered products** | | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | | |
| Framework for Development of Partnership and Offtake Agreements for Key Manufacturing Segments for Import Substitution developed | Development of Framework for development of partnership and offtake agreements initiated | Development of Framework for development of partnership and offtake agreements initiated |
| Technology needs of key manufacturing segments targeting import substitution established | Technology needs of value chains in prioritized sectors established and technology Information aggregated | Technology needs of value chains in prioritized sectors established and technology Information aggregated |
| Sales and marketing support provided to key manufacturing segments targeting import substitution | Relationships with potential MDA customers through sales outreach established | Relationships with potential MDA customers through sales outreach established |
| **Department:003 Industry 4.0+** | | |
| **Key Service Area:370002 Technology and Innovation** | | |
| **PIAP Output: 13313103 Industry 4.0+ Technologies (IoT, Controllers, Enterprise Software, Sensors, robotics, additive manufacturing) developed** | | |
| **Programme Intervention: 133131 Support Technology Development, Transfer, Industrialization and Commercialization in the Prioritised Industrial Value Chains** | | |
| Electronics Manufacturing Facility with manufacturing capacity of 100,000 units per year operationalised | Electronics Manufacturing Facility commissioned | Electronics Manufacturing Facility commissioned |

# VOTE: 167 Science, Technology and Innovation

# VOTE: 168 Uganda Freezones and Export Promotion Authority

Quarter 2

## Performance highlights for the Quarter

1. Entebbe International Airport Free Zone completion level is at 95% from 90%.
2..UFZEPA licensed 9 Free Zones in 2025. This increased the total number of licensed free zones from 43 in June 2025 to 52 by December 2025.
3. During this period 2025/26 Free Zones generated an estimated USD 12.30 million in additional investment
4. Created 2,948 new jobs created in the Free Zones
5. Local purchases amounted UGX UGX23.8BN
6. Tax Revenue generated from the Free Zones stands at UGX 11BN
7. Exports from Free zones between July and December 2025 amounted to USD 927.47M in gold, coffee, wheat, flowers and horticulture.
8. Facilitated Two (2) Free Zones to acquire financing from UDB amounting to UGX 1.9BN
9. National Merchandise exports in Quarter 1 FY2025/26 stood at 3.27 billion. Data up to December is still being compiled by BOU
10. Export Awareness, Training and Capacity building – 334 exporters/MSMEs trained /capacity building on export readiness
11. Participated in 5 international trade events and these include;World Expo 2025, Osaka, 9th Tokyo International Conference on African Development (TICAD 9), Intra-African Trade Fair 2025, Algiers, Algeria, Malaysia International Halal showcase, World Halal Summit and Expo, Turkey 2025.
12. Provided market information and customized advisory services where 157 walk-in clients were facilitated with information and counselling services, 36 export-ready companies were recommended to (MAAIF) for issuance of horticulture export permits, and 13 companies were issued exporter certificates to start exporting.
13. UFZEPA participated in the Kenya-Uganda bi-lateral negotiations to resolve outstanding tariff and non-tariff barriers inhibiting trade between Uganda and Kenya. Both parties agreed to implement the provisions as enshrined in the Customs Union Protocol.

## Variances and Challenges

# VOTE: 168 Uganda Freezones and Export Promotion Authority

Quarter 2

1.Inadequate financing for the Authority to execute its mandate and implement all its Interventions as stipulated in the Program Implementation Action Plans (PIAPs) of the NDPIV.
2.Lack of sizeable strategic land for the establishment of Public Free Zones: The Authority's mandate to develop public Free Zones has been constrained by the scarcity of adequately sized and contiguous land parcels.
Weak Policy and Regulatory framework on Free Zones: The Free Zones Programme in Uganda is not harmonized with the regional frameworks leading to poor implementation of the incentive regime.
3. Existence of several Single Factory Units as Export Processing Zones: constrains service delivery and limits the ability to take advantage of industrial clustering and agglomeration benefits which are inherent in well-established and planned Free Zones.
4. Limited number of operational Free Zone schemes and restricted market access: Uganda's small number of operational Free Zone schemes has limited visibility, investment attraction, and economies of scale.
5. Inadequate Market Intelligence, Export Product development, and Profiling of supply chains limiting market penetration and sustainability.
6. Lack of an interactive and comprehensive exporter database which has continued to constrain the Authority's ability to disseminate trade and market information to Exporters.
7. Inactive and underutilized Trade and Economic Agreements has led to underutilization of negotiated markets for Uganda's products.
8. Low global visibility of Uganda's Export in International markets

| Outputs Planned in Quarter | Actual Outputs Achieved in Quarter | Reasons for Variation in performance |
|---|---|---|
| **PIAP Output: 07021704 Market linkages between domestic, regional and internal MSMEs created** | | |
| **Programme Intervention: 072521 Implement Trade facilitation strategies** | | |
| Working relations (MoUs) with strategic trade and business development organizations in target markets (Export promotion agencies, Chambers of Commerce, Industry associations etc.) established. | Sixty-three (63) clients – prospective and active exporters – provided with customized advisory services (information and guidance) on export procedures and opportunities, market information and intelligence, plus business support services | Limited funding |
| The Ugandan export community and the diaspora directly linked to strategic partners (individuals and institutions) in target markets by subscribing to key international organizations for the target export sectors | Seventeen (17) exporters, together with nine (9) Trade Support Institution (TSI) staff, trained on the use of ITC Market Analysis Tools (TradeMap, Market Access Map, and @-ping) to gather market information and intelligence – market trends and potential, tariffs, identification of market opportunities, etc. Training undertaken in collaboration with MUBS and ITC-certified trainers | Planned information dissemination session not undertaken due to a lack of sufficient budget |
| Conduct 1 Regional Export Awareness Engagements & Campaign Conduct 1 Export Business Clinics | Halal Expo 2025 – Istanbul, 26th to 29th November 2025: UFZEPA, in collaboration with MTIC and the Embassy of Uganda in Ankara, led Uganda's official participation at Halal Expo 2025 - Istanbul. Other agencies that constituted the Uganda delegation included UNBS and the Uganda Halal Bureau. Uganda showcased products from over 20 halal-certified companies across 5 sub-sectors (dairy, spices, grains, processed food items, and hospitality services), generating 40 qualified buyer leads and facilitating direct buyer linkages for 4 Ugandan firms, strengthening Uganda's market entry into the USD 2.4–2.5 billion global halal market. | No variation |

# VOTE: 169 Uganda Vocational and Technical Assessment Board

Quarter 2

## Performance highlights for the Quarter

a) 13,610 Real-life projects for 32,612 candidates from 324 assessment centres were inspected
b) Developed 1619 (TET 1070 & VET 549) sets of assessment tools for Business, Humanities and Home Science by 202 assessors
c) 3,101 assessment tools/test items were successfully developed and moderated (1,463 for formally and 1,638 for informally acquired skills)
d) 137,546 (F 56,892 and M 80,654) candidates formally acquired skills assessed for the Nov/Dec 2025 series in 743 assessment centres.
e) Printed and issued 11,330 transcripts and 8,885 certificates.
f) Marking of Skills Development Centres for 20,234 (F 4673 & M 15561) and National Certificates 52,479 (18,204F & 34,275M) assessment by 367 assessors
g) 4,526 trainees assessed in Dec 2025 from 19 Presidential Industrial Hubs across the country.
h) Conducted 1 stakeholder feedback workshop for 582 participants in Central (181), West (183), East (97) and North (121)
i) Retooled 74 (F 18F & M 56) assessors conducted at Namanve with 08 UVTAB staff
j) 33 program/curriculum content developed and submitted awaiting review by the Sector Skills Expert committees.
k) Conducted Training Needs survey for entrepreneur in collaboration with War Child Canada in the West Nile and Western Uganda conducted.
l) 1 consultative meeting with the Internal Auditor General
m) 3 Board and 6 Committee meetings convened, 145 staff were validated and approved BFP FY 2026/27.
n) BFP FY 2026/27, physical performance of the Board was monitored, Re-scoping feasibility study for Namanve project, ESIA for UVTAB Assessment centre, Financial Statements prepared.
o) 109 staff members paid PAYE, NSSF and Gratuity.
p) Medical outreach camp for 312 assessors to promote health and wellbeing conducted at the Public Health School of Nursing and Midwifery on 22nd Nov 2025.
q) Isolated CCTV back up is done on a daily basis on a dedicated server
r) Offsite data storage and recovery system updated with NITA-U

## Variances and Challenges

a) Sector Skills Expert Committees have not been constituted thus delaying the curriculum development processes.
b) Lack of printing papers for certificates and transcripts thereby increasing on the backlog
c) Accreditation/inspection of new centres as the demand for assessment increased awaits licensing by the TVET Council.
