## Variances and Challenges

Lira University budgeted for a total of UShs. 46.149 billion only during FY 2025/2026. By the end of second quarter however, the total release was UShs. 25.257 billion only, comprising of Wages (UShs. 14.388 billion), non-wage (UShs. 6.754 billion) and GoU Development (UShs 4.115 billion). Out of the total released, UShs. 21.630 billion was spent by the end of the quarter (comprising UShs 13.491 billion on Wages, UShs. 5.538 billion on nonwage and UShs. 2.601 on GoU Development).
In a nutshell therefore, 54.7 % of the Budget was Released, 46.9 % of the Budget was Spent and 85.6 % of the Releases was Spent by the end of the quarter.
The following challenges should however be noted since they affected budget execution:
1. The funding is still low in respect to the growing number of academic programmes and students population
2. Lira University still has a low staffing level of 22% only. The University continues to experience a low number of Academic staff and Technicians which does not match with the increasing number of academic programmes driven by the ever-increasing demand for quality higher education. This low staffing affects the effective delivery of services.
3. Low release of the development fund to fund the approved successor projects

## Performance highlights for the Quarter

Delayed recruitment to replace staff who left the university affected funds absorption under wage with the corresponding NSSF; and

Delayed procurement processes which affected absorption of funds and also resulted into partial implementation of planned outputs of funds relating to procurement.

## Variances and Challenges

Published 24 articles in international peer reviewed journals;

Submitted four proposals for external funding;

Developed one digester complex innovation producing clean methane gas at Kyembogo;
Developed a semi commercial self regulating cold room with a decked solar dryer;

Developed and pilot tested Software for preparing a teaching timetable;

Reviewed 07 academic programs in line with Competence Based Education;
Organized and conducted 2 Farmer demonstrations and trainings on plant and animal doctor clinics;

Promoted dairy herd improvement among dairy farmers in Rwengaju Model Village by offering artificial insemination services using sexed semen from Kyambogo Dairy Technology and Innovation Centre;

Retooled 30 Faculty staff (10 female, 20 male) in STEM/STEI innovation and commercialization processes.

Maintained the upgraded bandwidth of 250 Mbps to facilitate the online teaching and learning processes as well as the facilitation of online administration operations;

12 sports teams Participated in Extra-mural Sports activities and won medals.

## Performance highlights for the Quarter

1. Mulago National Referral Hospital secured three internationally recognized ISO certifications (Integrated Management Systems (IMS) certification for ISO 9001:2015, ISO 14001:2015, and ISO 45001:2018), placing it among the world's leading healthcare institutions.
2. Successfully performed 03 Kidney transplants.
3. Expanded the scope of super-specialized services through the introduction and operationalization of Cardiac MRI services; pediatric cancer care; and adoption of a neuro-operating microscope that allows precise operations delicate brain structures.
4. Conducted an Orthopedic and Orthoplastic surgical camp during which 16 patients with complex bone fractures and severe soft-tissue injuries benefited from super-specialized reconstructive and orthopedic surgeries.
5. 21 Nurses and 01 Medical Officer appointed and deployed during the Quarter.
6. Implemented the Rewards and Sanctions Framework, culminating in the recognition and rewarding of outstanding performers during the end-of-year staff celebration.
7. During Quarter 2, the Hospital delivered extensive tertiary and super-specialized health services, recording 50,807 specialized outpatient visits and 12,149 inpatient admissions across all tertiary care departments. A total of 2,994 super-specialized surgical procedures and 3,022 dialysis sessions done.
• Laboratory services registered 46,391 hematology investigations, 218,089 clinical chemistry tests, 31,271 microbiology investigations, 18,568 routine laboratory studies, 2,832 hormonal assays, 4,175 histo- and cyto-pathology investigations conducted, 58 flow cytometry studies done, and 2,220 units of blood were transfused.
• And, Radiology and imaging executed 2,421 conventional radiography examinations, 50 fluoroscopy-guided procedures, 2,167 CT scans, 507 MRI scans, 3,324 ultrasonography examinations, 41 mammography studies, 299 interventional radiology procedures, and 37 nuclear medicine studies.

## Variances and Challenges

1. Staffing gaps i.e both number and skill mix for the intended specialization due to wage constraint.
2. Demoralized support staff who are Non-scientist due to wage discrimination, yet all are exposed to same medical risks and are collectively working tirelessly to provide quality specialized services.
3. Budget inadequacies for critical operational items including utility, security, waste management, dialysis consumables and other critical supplies resulting to inevitable domestic arrears.
4. High Patient Load especially in Neuro, Accident & Emergency, Trauma, sickle cell and medical wards.
5. Limited coverage of the Integrated Hospital Management System (IHMS) due to incomplete ICT infrastructure backbone. This curtails automation/ digitization agenda.
6. Inadequate accommodation for staff working in critical areas. The construction of the 150-staff housing units has been long standing due to delayed funding.
7. Encroachment on Mulago's land.
8. Most of the African Development Bank (ADB)–front-loaded equipment has become worn out, resulting in frequent breakdowns and high maintenance costs.
9. A contractor was procured (for the completion of renovation works at Lower Mulago) and the site was duly handed over. However, commencement of works delayed due to lack of funds (arising from delayed releases by the Ministry of Finance) to meet the required advance payment as provided for under the contract terms.

## Performance highlights for the Quarter

During the period October to December, the Hospital experienced very high service demand, with bed occupancy reaching 212 percent, indicating severe congestion and sustained pressure on inpatient services. Performance was strong in several priority areas, notably immunization services, which increased by 160.8 percent due to child health days in November, rehabilitation services, which rose by 97.0 percent, and alcohol and drug use services, which expanded by 54.0 percent.

Improvements were also recorded in child and adolescent mental health services with a 20.2 percent increase, radiology investigations which grew by 18.7 percent, and outreach clinic attendance which increased by 14.4 percent, reflecting enhanced access to specialized and community-based care. However, declines were observed in general outpatient attendance by 37.1 percent, patient resettlement by 25.6 percent, HIV clinic attendance by 13.4 percent, inpatient days by 11.3 percent, patient admissions by 4.9 percent, and laboratory investigations by 3.4 percent, largely due to congestion, limited resources, and pressure on hospital infrastructure arising from prolonged patient stays.

## Variances and Challenges

Variations in performance during the October to December were influenced by several factors. Quality improvement initiatives aimed at decongesting the Hospital contributed to reduced inpatient numbers. In addition, fewer patients sought services during the festive season, affecting attendance across multiple service areas.

Laboratory output declined partly because the chemistry analyzer machine was non-functional and due to reduced community samples following the withdrawal of USAID support. Conversely, radiology services recorded over-performance as more patients continued to seek affordable diagnostic services, supported by the availability of a new X-ray machine, ultrasound services, and MRI.

The challenges were due to :
1. Low staffing levels (49%) yet the patient load is huge and growing.
2. Inadequate wage and inability to recruit additional staff including those recently laid off due to American government executive orders.
3. Inadequate Non-wage budget for:
a) fuel, food, non-medical sundries (Soap and detergent) and other commodities.
b) maintenance of buildings and equipment coupled with a high destruction rate by patients.
c) Support supervision to the regions and outreach activities.
d) training of super specialists to match the mandate and the intended level of service at Butabika Hospital
e) Specialized medicines required for the Medically Assisted Therapy for injection drug users which were previously being provided by the American Government.
4. Overcrowding in wards (Bed Occupancy Rate of 224%) and clinics due to a dysfunctional referral system.
5. Very old fleet of vehicles that are costly to maintain (ages between 15-20 years) and yet there is a ban on procurement of vehicles.
6. Inadequate infrastructure to accommodate and contain the many patients coupled with lack of an infrastructure development funds to expand the congested patient spaces/wards and complete the hospital Perimeter wall.

## Variances and Challenges

The following challenges affected services delivery by the hospital.
1. Service delivery continued to be affected by inadequate staffing levels, a number of staff having retired, transferred or died and the process of recruitment to fill the gaps takes longer than expected.
2. The high number of refugees receiving medical services from the hospital: about 4% of the total inpatient admissions and total OPD attendance were non nationals and refugees. This has had implications on the hospital plan and budget.
3. Supply of medicines & supplies and specialist equipment could not match the demand most of the time in the quarter and this affected performance of hospital planned outputs like immunization, outpatient attendance, and diagnostics among others.
4. Power and water supply from the providers was fairly stable in the quarter however a lot of arrears have accumulated. The providers continually keep demading payments with threats of disconnection.
