

Vote Budget Framework Paper FY 2021/22

VOTE:618 PAKWACH DISTRICT LOCAL GOVERNMENT

V1: VOTE OVERVIEW

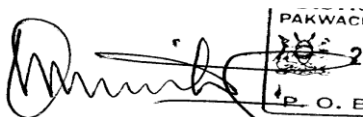

Foreword

The Budget Framework paper for the financial year 2021/20 has been developed in accordance with the Third District Five-year Development Plans 2020/21-2024/25, National Development Plan III (2020/21-2024/25) Vision 2040, sustainable development goals and policy guidelines from the different line ministries. It is important to that as the country transitions to the development planning approach, the district Budget framework paper for financial year 2021/2022 is aligned to the program based approach. This BFP for financial year 2021/22 is an extract of the second year in from the DPP III. The process of developing this plan was participatory in nature ranging from the district budget conference which was conducted on the month of November at the district headquarters. Due to the COVID -19 Standard operating procedures, participation was limited however a number of stakeholders ranging from political leaders, technical staff, religious leaders and development partners contributed to the ideas which form this budget framework paper.

The funding for this plan is expected from different Central Government grants which include among others District Discretionary, Sector Development grants, Sector Non-wage, District unconditional grant wage and non-wage and other government transfers. More funding is expected from donors like UNICEF Uganda, GAVI, World health Organization, UNFPA among others both under on budget and off budget support. The development direction for the district is improving the quality of both primary and secondary education, Infrastructural Development under Roads, Water, Education, Health, enhancing agricultural production and environmental protection and management.

The district continues to face a number of challenges including Low staffing levels, limited wage bill, difficulty in attracting and retaining of staff in hard to reach and stay areas, disasters which have continuously destroyed facilities like, health facilities, and water sources, bridges and roads, hard terrain making costs of constructing facilities in such areas very expensive hence consuming much of the already limited resource envelope. We hope to work hard to ensure that the funds are utilized as per the stipulated guides to meet all the targets for the financial year 2021/22

V2: PAST VOTE PERFORMANCE AND MEDIUM TERM PLANS

Performance for Previous Year FY2019/20 (Y-1)

The district received a total of shillings 18,187,035,000 out of the approved budget of 21,322,094,000 which is represented by 5 % of the annual approved a below target performance mainly attributed to receipt of supplementary funding for gratuity. Locally raised revenues, and external financing performed very poorly at 55%(Ugx. 1,148,906,000) and 0%(Ugx. 0) of the approved Ugx. 2,080,899,000 and Ugx.2,078,315,000 budgets respectively. Meanwhile on the other hand Other Government Transfers and discretionary Government transfers performed fairly well at 87%(Ugx. 2,787,397,000) and 99 %(Ugx.3,20,907,000) of the approved Ugx. 3,215,20,000 and Ugx. 3,226,336,000 of the planned budgets respectively during the financial year. Conditional Government Transfers over performed at 100%, that is, UGX.11,035,824,000, of the planned UGX. 10,721,124,000. . Under Wage, some staff especially under health sector were not paid attributed to delay in recruitment which affected their timely access to the Payroll. Overall, the COVID-19 pandemic and the subsequent lock-down affected implementation of a number activities in the district. The district will commit to ensure that the absorption capacity of funds is improved in the subsequent financial year and uncompleted projects are completed and operationalized.

Performance as of BFP FY2020/21 (Y0)

The district received a total of 4,904,202,000 out of the approved budget of 26,414,216,000 which represents by 19% of the annual approved budget. This shows below target performance which is mainly attributed to non-receipt of capitation grant for both primary and secondary schools affecting conditional transfers (23%) as result of the COVID-19 Lock down of Schools at all levels. Donor funding also performed very poorly at 6% due to the changes in the funding modalities by the major implementing partners in the district. Other Government transfers performed at only 5% due to non-realization of UWEP, YLP funding and non-release of NUSAF 3 funds for Sub Projects. Out of the received funds, 4,904,202,000 were disbursed to the departments which are 19 % of the budget released. The departments in total spent shillings 3,242,737,000 which 66% of the total quarterly releases and 16% of the annual performance target. Reasons for below target performance is attributed to delayed procurement for capital projects which was at evaluation stage by the end of the quarter.

Planned Outputs for FY 2021/22 (Y1)

The overall planned revenue of the District in the coming FY 2021/2022 is projected at approximately 26.414 billion Uganda shillings only. Of this, 9.133 billion is for wage, while 13.004 billion is for non-wage recurrent grant. 3.339 billion is for domestic development grant, while 0.936 billion will be from external financing. Over 90% of the total budget is expected to come from central government. Locally raised revenue only accounts for about 3% of the total budget .This indicates that the district is largely expected to rely on central government transfers and this forms the basis for a number of interventions that have been earmarked for implementation for the next financial year to step-up the generation of local revenue.

Medium Term Plans

In the medium term the district's focus remains on up-scaling the quality of education through provision of facilities that promote retention of pupils in schools, especially the girl child, provision of reading materials, desks, recruitment of teachers and intensifying supervision of schools. Another focus is on provision of quality health services with emphasis on preventive as opposed to curative approach to health. Mindset change through sensitization of the community on the current government programmes. Job creation through provision of skills that can lead to job creation rather than job seeking through empowering existing technical schools through cofounding their initiatives. In agriculture, the focus is on mechanization and value addition and access to market information and increasing the bargaining power of the farmers through formation of cooperatives. The district also has plans to increase safe water coverage, provision of water for production through construction gravity flow schemes ,valley dams and drilling of deep boreholes.

Efficiency of Vote Budget Allocations

Efficiency in budget allocation is very key for purposes of realizing results. Pakwach is a newly created district, carved out of Nebbi in the year 2016/2017. Overtime, Pakwach District has experienced diverse challenges resulting from influx of persons from neighboring districts/countries, especially DRC, who come to seek for health, education and other services. This has created pressure on the various infrastructure eg health, education, and other natural resources and therefore leaving Pakwach in a state of having to address these challenges amidst the meager resources that the district is to receive. This undermines the efforts that are being put to develop the district hence calling for support from the government and other development partners if the district is to be seen climbing the ladder of success.
