Registry reorganized for proper archival and retrieval of documents including dormant teacher files weeded out. Ministry documents filed and dispatched to the intended recipients.	Appraised 760 files, weeded out 89 inactive ones, and established a filing system for ministry staff, school teachers, and pensioners. Verified pension files and appointment letters for newly recruited and posted teachers to ensure payroll integrity and eliminate ghost workers and fraudulent claims. Filled and dispatched documents to relevant officers and the appropriate offices, ensuring timely access to essential information for informed decision-making.	This entailed analyzing all existing records of tertiary and secondary schools' teaching staff files and the Annual Confidential Report (ACR) folder to establish those still in service and those not. Documents include appointments, postings, transfers, confirmations and all other letters provided for in the ESC minute books.

Ministerial and Inter-ministerial consultation and coordination activities conducted. Ministers Political Assistants facilitated National functions, special assignments for Ministers facilitated and AFCON preparatory activities monitored	Conducted one (01) ministerial and coordination activities aimed at building political and administrative consensus around key policies or reforms i.e the African Ministerial conference on E-learning in Dar-el-Salam on 7th-9th May 2025, aimed at developing skills for the digital workplace and building IA readiness in Africa. Paid duty facilitation allowances to three (03) Ministers' Political Assistants to handle correspondence and follow up on important matters. Monitored five (05) ongoing construction projects (i.e Kyambogo, FUFA Kadiba and Makerere training grounds, as well as the Hoima and Lira stadiums) intended to measure the progress of the construction against timelines, ensuring that deadlines are met.	Other meetings were also held throughout the quarter with various entities (i.e the Parliamentary Education Committee and MoFPED) on the sub-program budget. A duty facilitating allowance is a type of financial incentive provided to public servants or government employees for performing additional duties and working under special conditions that go beyond their normal job responsibilities. The Ministers represented the Vice President and the Government, respectively. These activities were carried out with the involvement of both the political leadership and the Ministry’s technical team, with backing from the National Council of Sports.

Medical support for staff and their immediate family, incapacity benefits and burial expenses for affected staff paid.	Paid medical support for 06 staff. Paid requests for incapacity, death, and funeral expenses for ten (10) affected Ministry staff.	This output is demand-driven and all submitted requests were considered.
Baggage allowance for staff paid	Held one breakfast meeting in December 2024. Paid Baggage allowances for seven staff.	The second meeting is scheduled for July 2025. Priority was given to staff whose need was presented before 2023 due to the inadequate budget.
Staff lists, Review of ESC and PSC Minutes for processing appointment letters reviewed and implemented, Deployment and confirmation letters on the QR coding system implemented Staff of Centralized Tertiary institutions trained on HCM modules	Appointment letters were issued to 1,277 teaching and non-teaching staff in secondary schools. These included 874 probation, 92 promotion, 186 confirmation, 10 study leave, 54 corrigenda, 14 regularization, 142 re-designation, 42 transfer, 1 posthumous, 2 local contract, 10 suitability interview recommendations, 8 rationalization, 3 vacancy, and 3 retirement cases. Capturing deployment and confirmation letters on the QR coding system was not implemented. Trained HRMD Staff on different HCM modules that included employee data management, payroll, and performance evaluations.	All minute extracts received from ESC and PSC were implemented, hence all successful candidates were issued appointment letters. Funds weren't released to undertake the QR coding system. Is this a procurement? If so then we need to amend the comment to capture that position.

5 binding machines procured to enhance staff effectiveness and productivity	Procured a total of 31 desktop computers and 7 laptops that were supplied by Luutin Technical Services LTD, while KKN Enterprises supplied 3 multipurpose printers and 1 heavy-duty photocopier. Development of a digital repository of all education resource materials not done.	Following the second budget call circular, an amendment was made to increase the number of desktop computers from 30 to 31 and include 7 laptops, due to higher demand from new staff. The remaining budget could only cover the purchase of 3 multipurpose printers and 1 heavy-duty photocopier. The procurement plan was amended to halt the development of a digital repository and instead provide for the procurement of a server at the Ministry Headquarters, and two power backups for the luggage scanners.
	Activity implemented in Q1.	Payments for the works done were rolled over to FY2024/25 from FY2023/24 due to budgetary inadequacies.
Project operational costs including lunch, imprest, oils lubricants, assorted stationery, toner, printing service facilitated	Facilitated staff with fuel and assorted stationery (i.e A4 copy paper, notebooks, sticky notes, envelopes, file folders, diaries & planners), which reduced workflow interruptions, especially for administrative and clerical roles.	Scheduled stationery requisition and distribution is implemented quarterly.
	Procured curtains and carpets for the Ministry offices at legacy, while delivery of Thirty-six (36) boardroom chairs, one (01) executive boardroom table, two hundred twenty-three (223) office chairs, one (01) customised office table, and one (01) reception table stalled due to non-payment and was rolled over to FY 2025/26.	The procurement process was initially cancelled after being deemed unnecessary due to furniture acquired from the Education Review Commission. However, it was later initiated, which ultimately led to the failure to complete the process on time.

Performance highlights for the Quarter

(i) Sixteen (16) new high-capacity oxygen plants were installed and operationalized in Gulu, Naguru, Mbale, Hoima, Mbarara, Lira, Jinja, Mubende, Fort portal, Upper Mulago, Mulago Isolation, Bombo, Kayunga, Kawempe, Kiruddu and Entebbe. With these plants, the medical oxygen supply in the country has been stabilized.

(ii) Twenty (20) Digital fixed X ray machines have been procured for 20 General Hospitals (Gombe, Kalisizo, Lyantonde, Bombo, Rakai, Masafu, Bundibugyo, Kambuga, Kisoro, Kaabong, Kagadi, Kamuli, Kapchorwa, Bwera, Kiboga, Kyenjojo, Koboko, Tororo, Kitagata and Bududa) and Installation is ongoing.

(iii) Seventeen (17) RRHs and twenty-five (25) General hospitals were provided with neonatal intensive care units (NICU) rooms and equipped with basic equipment such as infant incubators, radiant warmer, phototherapy units and oxygen concentrators.

(iv) Fourteen (14) Regional Referral Hospitals have been equipped with CT scans and these are Entebbe, Jinja, Mbale, Soroti, Moroto, Lira, Gulu, Arua, Masaka, Mubende, Mbarara, Kabale, Hoima, and Fort Portal.

(v) Three Regional Blood Banks in Hoima, Arua, and Soroti have been completed, equipped and commissioned.

(vi) The National Medical Store (NMS) has implemented the NMS+ERP.The system has been rolled out to 3433 public health facilities and 138 districts, maintaining over 90% ordering rates.
(vii) Forty-one (41) Senior Consultants and 165 Consultants were recruited and posted to various referral hospitals and Non-For-Profit Hospitals and specialized Hospitals.

(viii) Routine immunization services were conducted through static sites and outreaches by all health facilities registering a vaccination coverage for children under one year at 91% (1,782,841 out of 1,959,166 children target whereas the Measles Rubella 1st dose immunization coverage was 88% (1,841,616/1,959,166 children).

Variances and Challenges

The overall performance in Q1 was at 63.2%. The overall performance of the FY 2024-25 was due to poor absorption of external financing funds due to delayed approval of no objection from the development partners.

The meetings were held to assess progress on the interventions made by the districts to solve some of the problems which were causing poor performance on the DLT. It was noted that districts had made tremedous progress on the actions agreed upon previously.	The variation of the 10 more districts covered was due to support from partners that caused over performance.

Industrial licensing Board Activities facilitated	Consultations were held with the Attorney General's Chambers, which advised that amendments to the Industrial Licensing Act should precede the reconstitution of the Industrial Licensing Board. The recommended first step was to undertake a Regulatory Impact Assessment (RIA). A Regulatory Impact Assessment was conducted, and its findings supported the abolition of the Industrial Licensing Board, proposing instead that regulatory functions be assumed by the Department of Industry and Technology, in alignment with the RAPEX recommendations. Draft Principles for the Amendment of the Industrial Licensing Act were developed and submitted, paving the way for the legislative reform process.	The planned output for FY 2024/25 was to operationalize a Functional Industrial Licensing Board. However, following Cabinet's review of the submitted nominees, further consultations were directed with the Attorney General's Chambers, which advised that the Industrial Licensing Act was outdated and required amendment prior to reconstituting the Board. A Regulatory Impact Assessment (RIA) was undertaken, which recommended abolishing the Board and integrating its functions within the Department of Industry and Technology, aligning with RAPEX reforms. As a result, the focus shifted from constituting the Board to initiating legislative reforms, including the development of Draft Principles for Amendment of the Act. This policy shift accounts for the variation between the planned and actual output.

Programme Intervention: 040105 Upgrade industries to make them sustainable, with increased resource-use efficiency and greater adoption of clean and environmentally sound technologies and industrial processes		
Functional Accreditation Body	During Q4, efforts continued towards operationalizing Uganda's national accreditation framework. Key activities included: A list of nominees for the Accreditation Board, together with their CVs, was compiled and submitted for vetting, pending Cabinet approval and appointment. The establishment of this Board is critical for reviewing and submitting the accreditation regulations for gazetting. Preparations for the commemoration of World Accreditation Day were undertaken. These included planning meetings and the development of dissemination materials aimed at raising awareness among policymakers and private sector actors on the importance of accreditation in supporting quality assurance, trade, and consumer safety.	he planned output was to have fully developed and gazetted Accreditation Regulations. While the regulations were developed and validated, they could not be officially submitted for gazetting due to the absence of the Accreditation Board, which is legally required to review and approve them. The process of constituting the Board took longer than expected, with nominee vetting and Cabinet appointment still pending by end of the Financial year
draft Iron and steel strategy developed	During Q4, progress was made in strengthening the evidence base for the Iron and Steel Strategy through the following activities: A field mission was conducted in Ankole and Kigezi subregions as part of a prefeasibility study to assess the viability of charcoal-based green steel processing. Three technical working group meetings were held to review and validate the findings of the prefeasibility study. The outcomes of these consultations are intended to inform the final version of the Iron and Steel Strategy, whose issuance was deferred to allow incorporation of additional feasibility findings scheduled in FY 2025/26.	The planned output was the final issuance of the Iron and Steel Strategy. While the strategy was successfully drafted following stakeholder consultations and field missions, its issuance was delayed due to new evidence from a prefeasibility study conducted in May 2025. The study confirmed the viability of sustainably produced charcoal for green steel processing, an option not considered in the original draft. To ensure the strategy is comprehensive and aligned with emerging sustainable technologies, a decision was made to pause issuance until a detailed feasibility study is completed in Q1 of FY 2025/26. This adjustment accounts for the variation between the planned and actual output.
Not planned for quarter	Greenhouse gas emission inventory reports were compiled for Hydrofluorocarbons (HFCs) and Lubricants.

Functional Industrial Licensing Board (30)	Under the target of establishing a Functional Industrial Licensing Board, key milestones were achieved during FY 2024/25. CVs for nominees were solicited, cleared, and submitted to Cabinet. Draft Industrial Licensing Regulations, including those specific to wood-based industries, were developed to guide the Board's operations. A Cabinet paper for appointment of nominees was prepared and presented by the Hon. Minister. Cabinet advised further consultation with the Attorney General's Chambers due to the outdated Industrial Licensing Act. The AG recommended amending the Act before reconstituting the Board, starting with a Regulatory Impact Assessment (RIA). The RIA, once completed, recommended abolishing the Board and transferring its functions to the Department of Industry and Technology in line with RAPEX reforms. Draft Principles for Amendment of the Act were developed and submitted, marking the start of the legislative reform process.
Accreditations regulations developed (30)	Significant progress was made towards the development of Accreditation Regulations during FY 2024/25. Consultative meetings led to the development and validation of draft regulations, pending review and submission by the yet to be appointed Accreditation Board. The UGANAS symbol, critical for issuing accreditation, was designed and registered with URSB. Capacity building was undertaken, with 30 personnel trained on ISO/IEC 17025, 30 on ISO 15189, and 20 on ISO 22000. Draft policies, procedures, and checklists for joint assessments with KENAS were developed and are awaiting finalization. A list of nominees for the Accreditation Board was compiled and submitted for vetting. Additionally, preparations for World Accreditation Day were undertaken to raise awareness about accreditation among policymakers and private sector stakeholders.

Strategy on iron and steels developed (80)	During FY 2024/25, significant progress was made toward developing Uganda's Iron and Steel Strategy. Consultative meetings and field missions to steel processing plants informed the drafting of the strategy, which was completed and ready for Ministerial issuance. However, a prefeasibility study conducted in May 2025 revealed the viability of using sustainably produced charcoal in green steel processing, an option not included in the initial draft. To ensure the strategy reflects this sustainable alternative, its issuance was put on hold pending a detailed feasibility study scheduled for Q1 of FY 2025/26. In Q4, a field mission to Ankole and Kigezi subregions was carried out as part of the prefeasibility study, followed by three technical working group meetings to validate findings. These will inform the finalization of a more inclusive and sustainable strategy.
Compilation of Green House gases (GHG) report produced (110)	Compilation of GHG emission inventory reports for, Iron and Steel, Cement and Lime, and Hydrofluorocarbons (HFCs) and Lubricants (Q4) was undertaken. These reports provide baseline data to inform Uganda's national climate commitments and policy decisions regarding the decarbonization of key industrial value chains. The process involved data collection, analysis of emissions factors, and alignment with international reporting standards, thereby strengthening Uganda's capacity to monitor and reduce industrial greenhouse gas emissions.

Industrial Processes and Products Use (IPPU) Greenhouse Gas (GHG) Mitigation and adaptation measures implemented (100)	GHG monitoring and sensitization field visits were undertaken across 18 industries, including 4 steel industries, 4 cement industries, 2 ceramic industries, 5 plastics industries, and 3 copper industries. These visits helped build awareness and track industry-specific mitigation opportunities, while promoting best practices for decarbonization and climate resilience. A series of stakeholder engagements organized, comprising 2 field visits and 3 technical working sessions involving representatives from MTIC, NPA, GGGI, MEMD, and the private sector. These led to the drafting and submission of an Expression of Interest (EoI) to the Climate Investment Funds (CIF) under the Industry Decarbonisation Program, with focus on steel and cement subsectors. As part of adaptation and technology transition initiatives, a pre-feasibility study was undertaken on charcoal-based green steel processing in Ankole and Kigezi, offering alternative low-carbon pathways for future industrial growth.

Performance highlights for the Quarter

The approved budget for Vote 016 for FY 2024/25 is UGX 2,025.440bn which was revised to UGX 4,284Bn through a supplementary arising out of RAPEX. Of this amount, UGX 34.172Bn (0.85%) is for wages, UGX 567.593Bn (6.89%) is for nonwage recurrent, UGX 1,563.569Bn (23.89%) is for GoU development, UGX 2,099.855 Bn(67.42%) is External financing and UGX 19.114bn (0.94%) for arrears.

Some of the performance highlights include:

Roads Subsector
• 100% completion achieved and Project under DLP for upgrading Kiwologoma-Kitukutwe-Kijabijjo road (4.5km) & BulindoNsasa-Namugongo road (4.56km) in Kira MC
• 99.5% construction works for Kadokolene swamp crossing (Budaka) completed;
• 2No. Cable trail bridges constructed i.e. Kabira-Nyakeina, Kikaada-Kyenyonga.
• 100% Construction of disability and pedestrian-friendly works of Aleles Bridge (Pallisa) completed;

National Roads
• Upgrading of 26 road development projects with a total distance of 1,383.76km continued
• 122.43 km equivalents were upgraded to paved bituminous standards.

Air Transport
• 94% physical works completed for construction of Kabaale International Airport.
• Operations of the Uganda National Airlines continued and all 6 Aircraft were maintained while 01 CRJ underwent a C-Check in April 2025.
• 12 Aerodromes maintained i.e. Arua, Gulu, Pakuba, Lira, Kidepo, Moroto, Soroti, Tororo, Jinja, Mbarara, Kasese and Kisoro undertaken with exception of Masindi.

Inland water transport
• 14 ferries continued operations at 13 ferry routes that link national roads at strategic locations;
• 02 BKK ferries for Lake Kyoga were launched into the lake and sea trials completed.

Railways subsector
• 45% of cumulative works for rehabilitation of Tororo-Gulu MGR line completed
• Under SGR; EPC/Turnkey Contract for development of the eastern route was signed and Project launched. The Financing framework for the project was approved by Cabinet.

Road safety
• Annual Road Safety conducted;
• 307,993 Driving licences issued.

Variances and Challenges

Delay in the release of funds for projects under UNRA and URF due to RAPEX affected the completion of the planned works

Performance highlights for the Quarter

Energy Development Programme
i. Completed the retransfer of the Umeme concession to the UEDCL.
ii. Commenced the preparatory activities for the construction of the Centre for Nuclear Science and Technology at Soroti University and the 8,400Mwe Buyende Nuclear Power Plant in Buyende.
iii. Introduction of a specialized Public Amenities tariff category for Public Institutions.
iv. Grew the electricity generation capacity to 2057MW following of 6.6MW Nyagak III power plant.
v. Expanded the high voltage network to West Nile region and reinforced the Western Uganda high voltage network following the completion of 400kV Karuma – Olwiyo line, 132kV Gulu Kole Nebbi Arua line and the 132kV Mirama Kabale line respectively. This bring the total high voltage network length to 2,547Km.
vi. Added a total of 197,390 new last mile electricity connections to the network, raising the total number of electricity connections to 2,305,296 customers connected and achieving a 60% access rate.

Mineral Development Programme
i. Completed airborne geophysical surveys and geological mapping, revealing high mineral prospectivity.
ii. Undertook iron ore and uranium exploration programmes which revealed promising prospects. Detailed evaluation is of the prospects in ongoing.
iii. Completed the negotiations with the selected developer for revamping Kilembe Copper Mines.
iv. Geothermal exploration at Kibiro and Panyimur confirmed the presence of high-temperature gradients, indicating potential for electricity generation. Drilling at these sites is underway to assess reservoir characteristics.

Petroleum Resources development
i. Completed negotiations with Alpha MBM Investments LLC for development of the oil refinery.
ii. Maintained competitive pump prices for petroleum products.
iii. Progressed development activities for EACOP, Tilenga and Kingfisher Central Processing Facilities to 46%, 62% and 76% respectively.
iv. Commenced the third licensing round for new petroleum fields.

Variances and Challenges

The key challenges faced by all the three programmes led by the Ministry include:

i) Protracted land acquisition for infrastructure development projects that is taking a long time and a considerable budget. The major constraints have been contestation of valuation rates approved by Chief Government Valuer by project affected persons and limited funding for compensation. The Ministry continues to implement its Grievance Handling Mechanisms under the different projects and also sensitize affected persons.
ii) Vandalism on the transmission lines and other installations. This causes financial and social loses to government hence affecting manufacturers, the health system and education system, among others. An Inter-Ministerial Committee has been set up to address the issues of vandalism. An operation plan has been developed and is being implemented. Ministry of Trade and Industry has been engaged to ensure strict regulation of the scrap industry.

iii) Illegal mining activities and operations affecting the environment and revenues generated from mining operations. The Ministry continues to implement the Mining and Minerals Act of 2022 to ensure efficient regulation of the mineral sub-sector. The Ministry will continue to work with the Ministry of Public Service to recruit additional inspectors to ensure proper monitoring and supervision of the mining operations.

iv) Inability to meet investment requirements in energy and minerals due to limited funding. These investments range from generation, transmission, and electricity distribution, affordable clean energy alternatives, mining investments among others. Given that supplementary budgets should be avoided as much as possible and only cater for unforeseen and unavoidable expenditure, this Ministry has reviewed its priorities and identified several foreseeable obligations, commitments and critical activities that require financing far above the budget ceiling provided.

Kibiro Geothermal Prospect conceptual model updated.	Stakeholder engagement (kibiro local community and the Bunyoro Kitara Kingdom) undertaken. Conceptual model for Panyimur geothermal prospect presented by Dr. Peter Omenda (Consultant) to the GRD staff on 13th June 2025. Shallow temperature surveys around Kabuga geothermal site (Kasese) undertaken.	The drilling of TGH cannot commence until ESIA certificate is issued by NEMA. Kabuga geothermal site was chosen for further surface studies.
Twenty four (24) TGHs at Kibiro and Panyimur Geothermal Prospects logged.	Sixteen (16) drilled TGH were successfully logged using a data logger (HOBO U12) and water level temperature meter(Solinst WLT 201) at Panyimur and Kibiro geothermal prospects. Handover of temporarily used land during the drilling of TGH at panyimur to the original land owners undertaken. Geothermal hosting communities in Hoima and Pakwach sensitization about national and local content undertaken.	Two of the drilled TGH at Panyimur collapsed and cannot be logged while another 2 TGH at kibiro were submerged by Lake Albert water.
Technical design and economic analysis for direct utilization at Karungu Geothermal Prospect conducted.	Karungu geochemical results processed and interpreted. GRMF-African Union Commission HEAT Application re-submitted and accepted. Karungu geological mapping report was also produced. Geophysical survey using the Magnetic method was conducted at the Okidi Geothermal prospect from 5th to 20th May 2025. Geological mapping of the Okidi geothermal site undertaken.	No variation

Project Final report and maps presented	The geoscience data base for Geophysical Atlas of Karamoja, Geophysical Atlas of Lamwo , Geological Atlas of Karamoja, Geological Atlas of Lamwo, Geochemical Atlas of Karamoja, Geochemical Atlas of Lamwo, National Geophysical Map of Uganda and Geological Survey Strategy of Uganda developed and established on the data server.	
Final maps and reports compiled and presented	Geophysical, Geological and Geochemical surveys have been completed in all zones were carried out and all planned samples were collected and prepared for mineral content analysis. The sample results on mineral content analysis from the Quality control laboratories in Spain and Canada were received and presented. The ground fieldwork involves Geological Mapping and Geochemical Surveys through a Joint Security Framework and Sensitization which are continuous in the Project cycle.

75% progress of EPC works of line and substations works	• Lot 1: Overall progress is at 52.28% • Lot 2: Overall progress is at 46.39% • Lot 3: Overall project progress is at 99% • Significant progress has been made at Buloba Substation, including the delivery of key equipment (transformers, breakers, disconnectors, surge arrestors), completion of major civil works (gantry and equipment foundations, oil containment pits), and installation of 220 & 132 kV surge arrestors and disconnectors, with additional transformer units expected on site by 20th May 2025. • At Bujagali Substation, the main transformer foundation was cast in March 2025, 220?kV equipment support foundations were excavated, 220?kV gantry foundation works are 50% complete, and one 250?MVA, 220/132/33?kV transformer is being prepared for shipment, expected on site by 20th May 2025. • At Mukono substations, all gantry and equipment support foundations for both 220?kV and 132?kV were completed in March 2025.	• The scope for reconductoring of the transmission lines excluded the refurbishment of old steel towers. This has led to reconductoring works stalling until funds can be sourced for refurbishment of old steel towers along the transmission line routes. • Funding Gap of JPY of 752,453,983 to the signed contracts for lot 1 & 2. • Depreciation of the Japanese Yen against the USD has resulted in a potential budget shortfall of USD 31.5m
