Matters to note in budget execution

## Vote: 176 Naguru Referral Hospital

### **QUARTER 2: Highlights of Vote Performance**

Inpatient services required oxygen that required the hospital to continue picking oxygen from Namanve Roofing's limited. The hospital oxygen plant performance was only able to produce 3 cylinders per which was not adequate for the patients including the COVID19 cases.

Under the Diagnostic services, there was a shortage of blood supply from the National Blood Bank during the quarter. Most of the reagents for Lab were not available from National Medical stores such as for CBC and HB.

The Hospital Management & support services had a challenge of broken, rusty metallic water pipes from the meter, the unplanned repairs were done however all the hospital water pipes require overhauling with plastic pipes.

The industrial washing machine was frequently down which prompted some emergency referral out of the hospital however repairs were done and was working by the end of the quarter. Other industrial equipment's that were repaired were the Oxygen plant and the heavy-duty iron board.

Management of hospital Records continued with the IHMIS (Integration of the Hospital Management information system) used for data collection as well as the manual system of data collection. However, Internet data was not constantly available which could have contributed to the loss of patient numbers recorded.

The hospital Internal Audit services quarterly report was not done because there was no internal audit officer in post. However, a committee in the hospital was formed to verify deliveries to the stores to ensure an internal control system in the hospital.

## Vote: 176 Naguru Referral Hospital

### **QUARTER 2: Highlights of Vote Performance**

#### Performance highlights for the Quarter

Medicines and Medical Supplies Cycle two delivery was at 71% of the items ordered. Every cycle budget was UGX 208,462,144/=. There was inadequate supply of vital drugs and some items were not delivered by NMS such as Implanon, Jadelle, N95 masks. Hydralazine inj and Bupivacaine inj. The hospital had to therefore procure emergency medicines Bupivacaine inj. Delmaw at 4,160,000/-

The cumulative for Q1 and Q2; % average delivery was 71%, Cumulative cost of items delivered from NMS were at 301,329,983/-. The cumulative total cost of items delivered as an emergency from NMS were at 6,223,071/= and total Items purchased from pharmacies 10,780,664/=.

Trauma, ambulance, and emergency Services had a total of 1138 in Emergency Medical, 771 Emergency Surgical, 900 Emergency Peadiatrics, 1838 Emergency Obs &Gyn, and 3497 Trauma Cases.

Total PCR (Polymerase Chain Reaction) test used to test infectious diseases i.e for COVID 19 were 2316, whereby 1801 were negative, and 515 were positive cases tested since July 2020-December 2020. Total Admissions were 92, Discharge 47, and 1 Death. 29 Home care visits and 4 staff training on related COVID19 management. 87 total referrals into the hospital from various private and government facilities and the rest were patients' walk-ins.

Under the Inpatient services, the Obs and Gyn improved the timely notification and review of maternal & perinatal deaths, Birth Notification, and Referral in outcomes. The RBF system had a positive impact on increasing the referral of complicated cases to the hospital.

The diagnostic services: Radiology efficiency and effectiveness of services were affected because patients for lumbar and pelvic x-rays were referred out due to faulty CT scan and use of mobile x-ray which had radiation low output. The bucky Philips X-Ray is beyond repair.

The Lab equipments that were not functional in the first quarter were all repaired and in good condition. User training was done for the Lab staff to reduce equipment breakdown. There was support from partners for TB tests for every client entering the hospital and the numbers testing positive had increased. 21% of TB tests were positive results. Microbiology services were available for Lipid profile and Liver function tests were increasingly being done.

The Prevention & rehabilitation services; Much as planned targets were achieved, the performance for ANC and Family planning reduced from the previous quarter due to clients easily accessing the private facilities after lockdown.

Human Resource Management Services were able to provide timely payment of salary and pensions by 28th of every month, held consultative meetings with the MoPS and MoH over reviewing staff structure, New Biometric machine installed with a camera and linked to IHRIS and accessible by the MoH, four staff recommended for study leave and four staff recommended for termination of appointment due to abscondment

#### Reasons for Variation in performance

The hospital met its output targets.

Referrals out reduced significantly because the hospital is evolving to a one stop centre for surgical services.

Day care surgery services continued being operational.

### Reasons for Variation in performance

The outputs targets were achieved. The RBF system contributed to increased numbers of referrals to the hospital as well as positive impact overall on OPD attendance numbers.

#### Reasons for Variation in performance

Ultrasound scan reduced due to increased referral out of hospital, Patients opt for computerised system.

X-Ray target was met, which was an increment of 7.7% from Q1 performance despite referral out of lumber, pelvis and skull patients due to low output of the mobile x-ray machine in use.

CT scan machine began working in November 2020.

The Lab equipment's that were not functional in the first quarter but in the 2nd quarter they were all repaired and in good condition.

#### Reasons for Variation in performance

The planed targets for ANC and Family Planning were not achieved.

The major reason was clients were easily accessing other facilities after the lockdown.

#### Reasons for Variation in performance

Much as planned targets were achieved, the performance reduced from previous quarter. The major reason was clients were easily accessing other facilities after the lockdown.

| Reasons for Variation in performance                    |                                    |                                                         |                  |

#### Reasons for Variation in performance

The hospital met its output targets.

Referrals out reduced significantly because the hospital is evolving to a one stop centre for surgical services.

Day care surgery services continued being operational.

| Total              | 78,080 |

#### Reasons for Variation in performance

The outputs targets were achieved. The RBF system contributed to increased numbers of referrals to the hospital as well as positive impact overall on OPD attendance numbers.

#### Reasons for Variation in performance

Ultrasound scan reduced due to increased referral out of hospital, Patients opt for computerised system.

X-Ray target was met, which was an increment of 7.7% from Q1 performance despite referral out of lumber, pelvis and skull patients due to low output of the mobile x-ray machine in use.

CT scan machine began working in November 2020.

The Lab equipment's that were not functional in the first quarter but in the 2nd quarter they were all repaired and in good condition.

### Reasons for Variation in performance

Much as planned targets were achieved, the performance reduced from previous quarter. The major reason was clients were easily accessing other facilities after the lockdown.
