Quarter 4

## Performance highlights for the Quarter

-The number of radiology investigations significantly increased to 626 investigations from the originally planned 568 investigations following the acquisition and operationalization of a new X-ray machine.

-During Quarter 4, the number of patients seen in outreach clinics increased significantly from the planned 881 patients to 2,228 patients. This improvement was driven by an increased budget for essential medicines and supplies, which enhanced drug availability for outreach activities. Additionally, deliberate referrals of stable patients to outreach clinics helped reduce congestion at the hospital while improving access to care within communities.

## Variances and Challenges

Inadequate Human Resource yet the patient load is huge and growing.

Inadequate wage funds to allow for recruitment of additional staff.

High costs of fuel, food, non-medical sundries (Soap and detergent) and other commodities.

Overcrowding in wards and clinics due to poorly functioning referral system. (Currently with a Bed Occupancy Rate of 224%)

Very high cost of maintenance of buildings and equipment coupled with a high destruction rate by patients.

Very old fleet of vehicles that are costly to maintain and yet there is a ban on procurement of vehicles

Inadequate funds for resettlement of patients hence persistent overcrowding.

Lack of a development budget for construction has greatly affected construction works and yet there is a lot of congestion on the available infrastructure.
