## Variances and Challenges

The hospital achieved most of its performance indicators, in areas of Inpatient admissions, antenatal services, immunisation services, surgical procedures and diagnostic services.

X-rays services were resumed after repair of the machine and installation of a new one

Low performance in Family Planning due to out of stock of frequently preferred methods

There was an improvement in outpatients seen and specialized outpatients

Dialysis services now fully available

No release for staff salary arrears and other domestic arrears despite the fact that funds were appropriated in the FY's budget

### CHALLENGES

The Vote budget still low which affects service delivery and effective delivery of its mandate within the region

Limited space leading to congestion and flow cases; space for general wards, laboratory and some specialized clinics

Insecurity due to incomplete perimeter wall around the hospital premises

Increased bills for water and electricity and cleaning expenses following new developments of CT scan, Intensive Care Unit (ICU), new oxygen plant, dialysis unit

Low staffing levels which stands at 27.5% caused by low wage bill yet the hospital has to functionalise new services like ICU and dialysis services and other specialities
