Quarter 4

Performance highlights for the Quarter

- 1) Management continued to improve on data management through digitalization using the Clinic Master. Computer Installations, staff trained, internet connectivity extended and burglar proofing for safety.
- 2) Renovation of the old MCH building was done to house the private services due to be started for Generation of Non Taxable revenue and the pharmacy was renovated.
- 3) Under G2G activity, most of the re-reimbursable milestones were met and the hospital received re-reimbursable funds that were used to procure some medical equipment, IT equipment including computers and 2 Biometric machines and furniture. In plan is renovation of identified old structures including the board room.
- 4) The hospital hosted the Health Services Commission team on routine work, HCM training was held by Ministry of Public Service and UHSS held training on Performance management.
- 5) The hospital went through the budgeting process for the F/Y 2023/2024 after close of F/Y 2022/2023. The recruitment plan was produced and the audit processes started including provision of responses to the Public Accounts Committee of Parliament.
- 6) More staff were received as vacant positions were declared for clearance by Ministry of Public Service for recruitment by Health Service commission. Gratuity and all pensioners were paid with no arears accrued.
- 7) With support from Infectious Diseases Institute(IDI) the Microbiology Laboratory was refurbished and new equipment including the Gene Expert 6 color machine, Blood culture machine and refrigerator, Autoclave and freezer. A CT-Scan was installed, dialysis and ENT services were started.

Variances and Challenges

VOTE: 412 Lira Hospital

Ouarter 4

1) As management continues to improve on data management through digitalization and using the clinic master, more IT equipment keeps being procured and installed but internet connections, power fluctuations and skill gaps still challenges the process.

- 2) There was a general power blackout in the region and this affected functionality of most of the hospital equipment. This also resulted into high use of fuel to run the standby generators against the budget.
- 3) Medicines and supplies were received in the quarter but some stock outs occurred due to the high number of patients treated. This generally affected the Specialised clinics that require thorough investigations like X-Rays, CT –Scans and Ultra Sounds filmings.
- 4) The main causes of morbidity and mortality in the hospital include trauma, malnutrition and maternal cases and the hospital has a big patient load especially in Paediatrics and maternity.
- 5) The hospital is still challenged with closure of the Hospital portion of the police road to avoid accidents and overcrowding on the way between the outpatients an inpatient department. Hopefully, this will be solved soon.
- 6) Management is further challenged with the Court Case with hospital land encroachers that has arisen again after the first leg where the same case was won. This has affected the plan to carry out evictions after finishing the opening of the hospital Land boundaries
