VOTE: 409 Masaka Hospital

**Quarter 2** 

### Performance highlights for the Quarter

We continue to deliver services and exceed some of the planned targets amidst a few challenges. In the second quarter management was able to hold the quarterly Board meeting. The maintenance workshop was able to relocate and install a 250kv generator using limited resources. This generator is capable of running the whole hospital and will save the entity the cost of running several generators at ago after all units are connected to it. The hospital has in the interim managed to get oxygen supply form Kampala following the breakdown of the oxygen plant.

### Variances and Challenges

Retooling budget as small as it is has not been fully released as planned to allow execution of the plans. The issue of utility bills that are not fully paid continues to stand out leading to accumulation of domestic arrears. The issue of delayed delivery of health supplies by NMS still stands worsening the stock out levels. Power surges continue to damage equipment with a recent incident damaging several computers for both the IFMS and electronic medical records, internet switches for medical records system and CCTV, printer for CT scan, Ultrasound scan and several power protection units like UPS. All this was costed at over Ugx.80,000,000. UMEME power black outs have put pressure on fuel especially for generators and ambulance services and we cant afford to carry out referral in ambulatory services. The hospital continues to experience shortage of oxygen supply due to a complete breakdown of the UNICEF oxygen plant. This has added extra operational costs of ferrying oxygen from Kampala at least twice a week which is expensive.
