### VOTE: 413 Mbarara Regional Hospital

Quarter 4

#### Performance highlights for the Quarter

- 1. The FY 2023/2024 ended well. All the funds budgeted for were released. An unspent balance of 0.232 Bn Shs for pension was realized.
- 2. Budgeting for the FY 2024/2025 was also successful. Clinical work also progressed well as planned activities were implemented.
- 3. Administrative duties were performed as scheduled, which included having a Hospital Management Board meeting as well as other meetings.

#### Variances and Challenges

- 1. Frequent break down of the x-ray machine, which leads to high maintenance costs. It is an old machine, hence need to have it replaced.
- 2. Inadequate non-wage budget to cover the utility arrears for water which currently amount to 568,226,956/-. Plans need to be made to cater for other means that are expected to cut down on water consumption in the hospital including installing water harvesting tanks and overhauling the water pipe network. All these need funds which the hospital does not have.
- 3. No wage to recruit staff and yet the hospital is grossly understaffed. This coupled with the high number of patients greatly results in insufficient time given to each patient.
- 4. Increasing electricity bill due to installation of new machines that include the CT scan, MRI machine and an oxygen plant at the Isolation unit. And yet still another bigger oxygen plant is going to be installed.
- 5. National Medical Stores delivered medicines and other health supplies, however, these are not enough because they are used up a few weeks after delivery. Patients are many and majority of them cannot afford to buy medicines.
- 6. The retooling budget is too little to cater for the needs of the hospital that include medical equipment, ICT equipment. Four operating rooms were renovated yet the hospital has no funds to equip them with equipment including operating beds, anaesthetic machines and an autoclave.
- 7. For infrastructure project, progress of work was very slow. The two blocks are at roofing level, but work is not progressing as scheduled.
- 8. Also, servicing of diagnostic and lab equipment is very expensive.

| Outputs Planned in Quarter | Quarter                    | performance              |

Project:1767 USAID support to Regional Referral Hospitals

PIAP Output: 1203011405 Reduced morbidity and mortality due to HIV/AIDS, TB and malaria and other communicable diseases.

Programme Intervention: 12030114 Reduce the burden of communicable diseases with focus on high burden diseases (Malaria, HIV/AIDS, TB, Neglected Tropical Diseases, Hepatitis), epidemic prone diseases and malnutrition across all age groups emphasizing Primary Health Care Approach

Targeted HIV testing done. Patients will be linked to care. HIV testing services given. Self testing kits for HIV distributed. Patients with advanced HIV disease identified and treated. Regional RMNCAH, regional Quality Improvement and Hub coordination meetings held quarterly. TB preventive therapy given and diagnosis done.

Individuals who were tested for HIV were 6,009. Of these, 137 were identified as HIV positive. All identified positives were linked to care.

Key Populations (KPs) and Priority Populations (PPs) who were reached with individual and/or small group-level HIV prevention interventions were 2,094 and 188 respectively. KPs reached and identified as HIV positiv, all (100%) were linked to HIV care and treatment services.

195 clients received PrEP refills excluding those newly initiated on PrEP.

The Self-testing kits that were distributed both at facility and in the community were 634 individuals with 100% feedback on test results where 07 positive individuals were identified and linked to care.

The newly identified HIV positive clients who received a CD4 test were 125(100%). Of these, 27 had CD4 test results below 200. Of those with CD4 below 200, all (100%) were screened for cryptococcal and TB disease.

These activities and more are still on going because the G2G project is in its 3rd quarter, which happens to be the GoU 1st quarter.

Project:1767 USAID support to Regional Referral Hospitals

PIAP Output: 1203011405 Reduced morbidity and mortality due to HIV/AIDS, TB and malaria and other communicable diseases.

Programme Intervention: 12030114 Reduce the burden of communicable diseases with focus on high burden diseases (Malaria, HIV/AIDS, TB, Neglected Tropical Diseases, Hepatitis), epidemic prone diseases and malnutrition across all age groups emphasizing Primary Health Care Approach

HIV prevention services offered for KPs and PPs. Prep CT services offered. Gender Based Violence cases attended to. EMTCT and ED services offered. Viral Load Coverage and suppression activities carried out. DTG transition done. TB prevention and diagnosis activities carried out. Onsite skills transfer done. Technical Support Supervision conducted.

Regarding Prevention of Mother to Child Transmission (PMTCT), A total of 387 mothers received ANC1 services with 60 (16%) receiving ANC1 services within the first trimester achieving 129% of the quarterly target (300).

HIV Exposed Infants (HEI) who received their first virologic test were 77, of which 100% (74/74) received their first virologic test within 2 months achieving 493% of the quarter target (15) and cumulatively achieving 373% to the annual target of 60.

About Viral Load Suppression, the hospital continued to use the audit tool and conduct viral load mop up to improve viral load coverage and hence monitor treatment outcomes.

The RRH offered GBV post violence clinical care to 177 GBV cases achieving 89% of the quarterly target (200).

The good performance in PMTCT is attributed to improved coverage and quality of antenatal care services in the lower level facilities within Ankole Region and the regional referral hospital being stationed to receive specialized cases.

Regarding HIV Exposed Infants, the over achievement of the target was due to the fact that the target set for us was too small compared to the volume of our ART Clinic and previous performance. We didn't identify any high-risk infant whose mother tested positive later in pregnancy.

#### VOTE: 413 Mbarara Regional Hospital

**Ouarter 4** 

#### **Annual Planned Outputs**

#### **Cumulative Outputs Achieved by End of Quarter**

Project:1767 USAID support to Regional Referral Hospitals

Budget Output:320020 HIV/AIDs Research, Healthcare & Outreach Services

PIAP Output: 1203011405 Reduced morbidity and mortality due to HIV/AIDS, TB and malaria and other communicable diseases.

Programme Intervention: 12030114 Reduce the burden of communicable diseases with focus on high burden diseases (Malaria, HIV/AIDS, TB, Neglected Tropical Diseases, Hepatitis), epidemic prone diseases and malnutrition across all age groups emphasizing Primary Health Care Approach

Activities to be done.
Linkage to HIV Care and Treatment services
HIV Testing Services (HTS)
HIV Self-Testing (HIVST)
Recency HIV testing
Advanced HIV disease mgt
Regional RMNCAH meetings
Regional QI meetings
TB Preventive Therapy
Hub Coordination

Individuals who were cumulatively tested for HIV were 9,776. All identified positives were linked to care.

Key Populations (KPs) and Priority Populations (PPs) who were reached with individual and/or small group-level HIV prevention interventions were 2,246 and 382 respectively. KPs reached and identified as HIV positive, all (100%) were linked to HIV care and treatment services.

330 clients received PrEP refills cumulatively excluding those newly initiated on PrEP.

Self-testing kits were distributed both at facility and in the community with 100% feedback on test results where positive individuals were identified and linked to care.

Two (02) HIV clients had positive serum CRAG results, received CSF CrAG test; all had negative results and received Fluconazole while eleven (09) clients had positive TB-LAM test results and were all initiated on TB treatment.

#### VOTE: 413 Mbarara Regional Hospital

#### **Annual Planned Outputs**

#### **Cumulative Outputs Achieved by End of Quarter**

Project:1767 USAID support to Regional Referral Hospitals

PIAP Output: 1203011405 Reduced morbidity and mortality due to HIV/AIDS, TB and malaria and other communicable diseases.

Programme Intervention: 12030114 Reduce the burden of communicable diseases with focus on high burden diseases (Malaria, HIV/AIDS, TB, Neglected Tropical Diseases, Hepatitis), epidemic prone diseases and malnutrition across all age groups emphasizing Primary Health Care Approach

HIV prevention services for KPs and PPs

Prep CT

Gender Based Violence

EMTCT and ED

Viral Load Coverage and suppression

DTG transition

TB prevention and diagnosis

Onsite skills transfer

**Technical Support Supervision** 

Pregnant women who were newly tested for HIV and identified as HIV positive were 06 (1.6%) and were all initiated on ART giving 100% maternal ART uptake. Later in pregnancy, 52 pregnant women were retested, and no mother was identified as HIV positive.

The interventions that sustain a good first virologic test within 2 months included; tracking of HIV positive pregnant mothers by EDD using a customized EDD tracker; immediate linkage of the mother-baby pair to EID service care point before discharge; synchronizing HEI's and the mother's appointment; pre-appointment reminders to mothers for

About Viral Load Suppression, the hospital continued to use the audit tool and conduct viral load mop up to improve viral load coverage and hence monitor treatment outcomes.

The RRH offered GBV post violence clinical care to 298 GBV cases cumulatively.

#### Cumulative Expenditures made by the End of the Quarter to Deliver Cumulative Outputs

UShs Thousand

#### VOTE: 413 Mbarara Regional Hospital

Quarter 4

**Table 4.3: Vote Crosscutting Issues** 

#### i) Gender and Equity

| Objective:                   | To provide inclusive, equal and accessible healthcare services to all deserving and critically ill patients despite of their gender, age, sex and sexual orientation, socio economic status of otherwise.   |
|------------------------------|---|
| Issue of Concern:            | Inadequate equal, inclusive and accessible healthcare to all deserving and critically ill patients despite their gender and its other traits  |
| Planned Interventions:       | <ol> <li>Gender-based Violence (GBV) Prevention</li> <li>GBV Case Identification and First-line Support</li> <li>GBV Clinical Response by implementing post-violence clinical care services</li> <li>Work with Civil Society organs</li> </ol>  |
| Budget Allocation (Billion): | 0.004   |
| Performance Indicators:      | 1. Number of people receiving post-gender-based violence (GBV) clinical care based on the minimum package. (600)  |
| Actual Expenditure By End Q4 | 0.001   |
| Performance as of End of Q4  | The RRH offered GBV post violence clinical care to 177 GBV cases. Individuals who received sexual violence clinical care based on minimum package improved from 23 to 97.   |
| Reasons for Variations       | This improvement in sexual cases identification is attributed to continued collaborations with MCH department and Uganda Police to track GBV cases and link them for post-GBV clinical care based on the minimum package, continuous improvements in documentation in the GBV registers upon receipt of services at the various service delivery points within the hospital and digitalizing GBV records. |

#### ii) HIV/AIDS

| Objective:                   | To reduce incidence of HIV infections by implementing various HIV prevention and HIV testing strategies at facility and community level.  |
|------------------------------|---|
| Issue of Concern:            | Increasing incidences of HIV infections.  |
| Planned Interventions:       | Other sexual prevention like adapt HIV prevention programming focusing on increased interpersonal communication     Improve Key populations' access to condoms and lubricants     Refer KP clients to STI screening, prevention, treatment, family planning   |
| Budget Allocation (Billion): | 0.008   |
| Performance Indicators:      | No. of people who received HIV testing services and received their results (5,000) % HIV positive individuals identified and initiated on ART (95%) No. of individuals who were newly enrolled on (oral) antiretroviral pre-exposure prophylaxis (PrEP) (393) |
| Actual Expenditure By End Q4 | 0.002   |

## **VOTE:** 413 Mbarara Regional Hospital

| Performance as of End of Q4  | Individuals who were tested for HIV were 6,009 and of these, 137 were identified as HIV positive and all (100%) were linked to HIV Care/ART. It is out of these positives that 117 clients aged 15 years and above consented for recency testing and it was observed that 14(12%) of the HIV positive individuals had a recent infection. Those who were initiated on PrEP were 195, those who received PrEP refills were 135 clients excluding the newly enrolled.           |
|------------------------------|---|
| Reasons for Variations       | There was no variation  |
| Objective:                   | To ensure total elimination of mother to child transmission / infections by implementing E-MTCT   |
| Issue of Concern:            | Existence of cases of mother to child transmissions.  |
| Planned Interventions:       | <ol> <li>Implement prevention and testing activities in MNCH setting</li> <li>Sustain family planning/HIV Integration to prevent unintended pregnancies</li> <li>Optimize ARV formulations and viral suppression for pregnant and breastfeeding women</li> <li>Provide HIV testing</li> </ol>   |
| Budget Allocation (Billion): | 0.004   |
| Performance Indicators:      | No of pregnant women with known HIV status at ANC1 (2000)  No of HIV + pregnant women who receiving ART to reduce risk of MTCT during pregnancy (395)  No of infants born to HIV + women to receive a first virologic HIV test by 12 mths of age (395)  |
| Actual Expenditure By End Q4 | 0.001   |
| Performance as of End of Q4  | During the reporting period, a total of 387 mothers received ANC1 services with 60 (16%) receiving ANC1 services within the first trimester and 99.7% had a known HIV status. Pregnant women who were newly tested for HIV and identified as HIV positive were 06 (1.6%) and were all initiated on ART giving 100% maternal ART uptake. Later in pregnancy, 52 pregnant women were retested and no mother was identified as HIV positive.                                     |
| Reasons for Variations       | This is attributed to improved coverage and quality of antenatal care services in the lower level facilities within Ankole Region and the regional referral hospital. HIV Exposed Infants (HEI) who received their first virologic test were 77, of which 100% (74/74) received their first virologic test within 2 months achieving 493% of the quarter target (15) and cumulatively achieving 373% to the annual target of 60.being stationed to receive specialized cases. |
| Objective:                   | Maintain viral load suppression among all HIV positive individuals initiated on ART above 95%.  |
| Issue of Concern:            | Reduction in Viral Load suppression to below 95%.   |
| Planned Interventions:       | <ol> <li>Client-centered interventions to ensure all clients receive all essential care and continuous antiretroviral treatment</li> <li>"First 180 Days" Package: Durable and continuous treatment of New Clients</li> <li>DSD models of family-based care</li> <li>Tracking results</li> </ol>  |
| Budget Allocation (Billion): | 0.003   |
| Performance Indicators:      | No. of adults and children currently receiving ART (10,655) Adults and children newly enrolled on ART (398) No. of ART patients with suppressed VL results (<1,000 copies/ml) documented in the medical or laboratory records/LIS in the past 12 months(9684)   |

## **VOTE:** 413 Mbarara Regional Hospital

Quarter 4

| Actual Expenditure By End Q4 | 0.00075   |
|------------------------------|---|
| Performance as of End of Q4  | By the end of the reporting period, there were 11,296 clients active in care (101% of the quarterly target of 11,237); of these, 10,590(94%) were on 1st line, 673(5.9%) on 2nd line and 33(0.1%) on 3rd line. Viral load coverage stood at 94%.  |
| Reasons for Variations       | This achievement is as a result of continuous weekly appointment keeping audits and tracking of clients by phone calls and SMS reminders. Reasons for losing clients are mainly due to un-communicated deaths for those with advanced HIV disease, self-transfer outs, excess pill balances accumulated over time to mention but a few. |

#### iii) Environment

| Objective:                   | To provide environmentally friendly health services  |  |
|------------------------------|--|--|
| Issue of Concern:            | Inadequate waste management right from the source of generation to the disposal point.   |  |
| Planned Interventions:       | Avail color coded waste bins     Carry out waste management assessments     Train health workers on waste management especially segregation     Maintenance and functionality of the incinerator     Work with the City Council to take domestic waste                                     |  |
| Budget Allocation (Billion): | 0.006  |  |
| Performance Indicators:      | <ol> <li>No of color-coded waste bins and liners availed in different sizes (100)</li> <li>No of trainings conducted for health workers and waste handlers on segregation</li> <li>Functional and well-maintained incinerator</li> <li>No of waste assessments carried out (12)</li> </ol> |  |
| Actual Expenditure By End Q4 | 0.0015   |  |
| Performance as of End of Q4  | Color coded waste bins and bin liners were availed to all clinical areas and in the hospital compound.   |  |
| Reasons for Variations       | Big sized waste bins are very expensive.   |  |
| Objective:                   | To provide a beautiful environment to aid not only in patient healing but in providing a conducive work environment for health workers and visitors.   |  |
| Issue of Concern:            | Landscape the hospital to improve the compound   |  |
| Planned Interventions:       | <ol> <li>Do landscaping the hospital compound to make it beautiful</li> <li>Plant more trees and shrubs</li> <li>Trim existing plants</li> <li>Plant trees below the cliff to stop soil erosion</li> </ol>   |  |
| Budget Allocation (Billion): | 0.020  |  |
| Performance Indicators:      | <ol> <li>Landscaped compound</li> <li>Fruit trees and shrubs planted</li> <li>Existing plants and flower plants well-trimmed.</li> <li>Existing cliff expansion stopped by planting trees to stop soil erosion</li> </ol>  |  |
| Actual Expenditure By End Q4 | 0.005  |  |

## **VOTE:** 413 Mbarara Regional Hospital

Quarter 4

| Performance as of End of Q4 | maintenance of the existing plant cover was done including outside the perimeter fence where trees were planted earlier.   |
|-----------------------------|--|
| Reasons for Variations      | Land scapping in the hospital was done because of the new constructions that include a Call and Dispatch Center, Neonatal Intensive Care Unit and an Oxygen Plant. |

#### iv) Covid

| Objective:                   | To continue screening for COVID-19 and avoid a surge in infections  |  |
|------------------------------|---|--|
| Issue of Concern:            | Laxity in screening for COVID-19 due to a belief that it was eradicated.  |  |
| Planned Interventions:       | <ol> <li>Strengthen infection control (IPC) measures in the hospital.</li> <li>Follow up observation of standard operating procedures in the hospital</li> <li>Disease surveillance continuity</li> <li>6. Test through lab to screen for signs</li> <li>Continue vaccinating activities</li> </ol> |  |
| Budget Allocation (Billion): | 0.005   |  |
| Performance Indicators:      | <ol> <li>No of IPC inspections done by the IPC team (12)</li> <li>Isolate, test suspected cases, routine test exposed staff.</li> <li>No of patients, staff swabbed for COVID-19. (5,000)</li> <li>No. vaccinated against COVID-19 (1,000)</li> <li>Surveillance reports submitted (4)</li> </ol>   |  |
| Actual Expenditure By End Q4 | 0.00125   |  |
| Performance as of End of Q4  | The Infection Prevention and Control committee continues to do inspections in the various areas in the hospital and also holds regular meetings. Community Health Department continues to carry out disease surveillance for other diseases other than COVID19, which is no longer rampant.         |  |
| Reasons for Variations       | There is no variation.  |  |
| Objective:                   | To ensure constant functioning of the Isolation Unit in readiness to handle any emerging infectious cases   |  |
| Issue of Concern:            | Closure of the unit due to near eradication of COVID-19   |  |
| Planned Interventions:       | <ol> <li>Functional Isolation Unit with permanent staff posted.</li> <li>Refresher trainings for staff</li> <li>Ensure availability of personal protective equipment</li> <li>Ensure availability of Infection Prevention and Control supplies.</li> </ol>  |  |
| Budget Allocation (Billion): | 0.005   |  |
| Performance Indicators:      | <ol> <li>Open and functioning Isolation Unit</li> <li>No of refresher trainings conducted (4)</li> <li>Percentage availability of personal protective gears (100%)</li> <li>Percentage availability of Infection Prevention and Control supplies (100%)</li> </ol>                                  |  |
| Actual Expenditure By End Q4 | 0.00125   |  |
| Performance as of End of Q4  | The Infectious Diseases Unit (Isolation Unit) is still functional.  |  |

# VOTE: 413 Mbarara Regional Hospital

Quarter 4

Reasons for Variations

There is no variation.
