### **QUARTER 1: Highlights of Vote Performance**

#### V1: Summary of Issues in Budget Execution

This section provides an overview of Vote expenditure

#### (i) Snapshot of Vote Releases and Expenditures

Table V1.1 below summarises cumulative releases and expenditures by the end of the quarter:

Table V1.1: Overview of Vote Expenditures (UShs Billion)

<sup>\*</sup> Donor expenditure information available

The table below shows cumulative releases and expenditures to the Vote by Vote Function:

Table V1.2: Releases and Expenditure by Vote Function\*

Billion Uganda Shillings	Approved Budget	Released	Spent	% Budget Released	% Budget Spent	% Releases Spent
VF:0156 Breeding and Genetic Development	4.05	1.31	0.37	32.4%	9.0%	27.9%
Total For Vote	4.05	1.31	0.37	32.4%	9.0%	27.9%

<sup>\*</sup> Excluding Taxes and Arrears

#### (ii) Matters to note in budget execution

Performance in the first quarter was affected by a number of challenges among which included the following;

• Irregular supply of electricity at head office led to on and off functioning of the liquid Nitrogen plant hence suboptimal production.

Lack of the IFMS system at NAGRC premises, this has delayed has delayed a number of transactions that have to be made since one has to look for a place where to work from.

- Despite efforts to desilt a few valley tanks ,Silting of valley dams in many of the NAGRC&DB farms led to infestation of cattle with Facioliasis leading to abortions in pregnant cows and heifers hence inconveniencing the breeding programme.
- Limited pastures due to the invasive weeds and thorny thickets at Kasolwe, Ruhengere and Nshara which

<sup>\*\*</sup> Non VAT on capital expenditure

### **QUARTER 1: Highlights of Vote Performance**

continues to maintain breeding stock in poor body condition thus delaying conception.

- •Established fodder bunks are still below planned acreage due to limited accessibility to cultivation machinery (tractors and implements) that would help in speeding up land preparation for early planting.
- Dimited number of the available cheap manual labor force to bush clear and prepare land for mechanized ploughing, harrowing and planting.
- •Time spent in removing Stumps from opened up/bush cleared areas is too long that it stalls mechanized preparation of land for planting, the need for necessary machinery.
- •Long procurement process that led to delayed delivery of planting materials and delayed establishment of fodder
- •Unavailability of enough vehicles to go to the field on time. Many of our functioning vehicles are beyond 7 years old and therefore they are quite inefficient.
- •A number of the institution's farms/ranches are not connected to the national power grid which affects timely reporting on performance and decision making.
- •Use of a manual machine for packing of semen into the straws is quite laborious and in-efficient; it affects quality of field straws.
- •Inadequate liquid nitrogen could not allow for the quarter's targeted semen processing and storage.

### Table V1.3: High Unspent Balances and Over-Expenditure in the Domestic Budget (Ushs Bn)

Table V1.3: High Unspent Balances and Over-Expenditure in the Domestic Budget (Ushs Bn)	
(i) Major unpsent balances	
(ii) Expenditures in excess of the original approved budget	
* Excluding Taxes and Arrears	

### V2: Performance Highlights

This section provides highlights of output performance, focusing on key outputs and actions impelemented to improve section performance.

Table V2.1: Key Vote Output Indicators and Expenditures\*

Vote, Vote Function Key Output	Approved Budget and Planned outputs	Cumulative Expenditure and Performance	Status and Reasons for any Variation from Plans
Vote Function: 0156 Breeding	ng and Genetic Development		
Output: 015609 N	Multiplication of pure Dairy anim	nals & appropriate crosses	
Description of Performance:	Development, multiplication and utilization of livestock genetic resources for example Multiplication of various cattle breeds (Dairy and beef), breeding and multiplication Pig germplasm, breeding and multiplication of goats, Breeding and multiplication of chicken.	A total of one hundred twenty one thousand nine hundred and thirty two (121932) improved animal genetic resources produced that is:53Dairy crosses 38Pure dairy 34BEEF CROSSES 60CONSERVATION 121,459Kuroiler chicks 197Kids born 91Camborough piglets	There was under performance in production of semen mainly due to the poor semen packing machine which should dearly be condemned or replaced with a modern automatic machine. There was under performance in production of poultry genetic resources due to the delayed restocking of the kuroiler parent stock line. Several repeats in animals led to low numbers of calves born.
Performance Indicators:			
Quantity of improved breeds produced (cattle, goats, pigs, chicken)	843,250	121,932	
Number of technicians trained in assisted reproductive techniques (AI,	50	26	

### **QUARTER 1: Highlights of Vote Performance**

Vote, Vote Function Key Output	Approved Budget and Planned outputs		Cumulative Expenditure and Performance		Status and Reasons for Variation from Plans	any
ET, NPD)						
Number of farmers sensitized in assisted reproductive techniques (AI, ET, NPD)		1,600		1,037		
No. of AI Satellite centres established		4		1		
Litres of liquid nitrogen produced		43,200		5,322		
Doses of semen produced and sold to farmers		76,200		950		
Output Cost	: UShs Bn:	0.800	UShs Bn:	0.018	8 % Budget Spent:	2.3%
Vote Function Cost	UShs Bn:	4.050	UShs Bn:	0.365	5 % Budget Spent:	9.0%
Cost of Vote Services:	UShs Bn:	4.050	UShs Bn:	0.365	5 % Budget Spent:	9.0%

<sup>\*</sup> Excluding Taxes and Arrears

Based on the performance highlights in the first quarter, the Accounting Officer would like to emphasize the following in order to improve vote performance;

- •1). Further training of staff to strengthen their skills in use of the IFMS and output Budgeting tool for improved handling of; financial, procurement, and reporting issues is necessary.
- •2). Allocation of more funding to enable implementation of un-funded priorities, e.g. Repair and maintenance of farm vehicles, maintenance of dilapidated farm infrastructure, bush clearing, procurement of state of the art semen processing machines, recruitment of more technical staff, etc.
- 3). Accessing/installation of the necessary hardware and software used in operating the IFMS locally at the station is very important to enable timely handling of both the financial transactions and generation of reports.
- 4) Having accomplished the first phase of restocked Aswa ranch with 1000 breeding animals, the institution faces a challenge of shortfall on the wage bill in post since extra staff were recruited and the same year Ministry of finance was informed in advance but we never received any response. The funds that were committed to fly in the breeding bulls for Aswa ranch from South Africa are inadequate.
- 5) There are inadequate AI breeding bulls a factor which calls for renovation and restocking of the bull stud at Entebbe.

**Table V2.2: Implementing Actions to Improve Vote Performance** 

Planned Actions:	Actual Actions:	Reasons for Variation
Vote: 125 National Animal Genetic Res. 0	Centre and Data Bank	
Vote Function: 01 56 Breeding and Genetic	Development	
<ul> <li>To develop and submit an additional budget that will facilitate activities of surveying all pieces of government land and obtain land titles for each one of them.</li> <li>Request for more funding to establish more fodder banks.</li> </ul>	One stock farm Lusenke has been surveyed and arrangements under the developed project proposal to fence have been made, a number encroachers have been dismissed through continued use of land for fodder establishment.	Inadequate funding to fence off all government farmland.
Vote: 125 National Animal Genetic Res. 0	Centre and Data Bank	
Vote Function: 01 56 Breeding and Genetic	Development	
- Continue requesting/writing to the Ministry of Public Service to consider the institution's request since full allocation of the required wage bill will enable NAGRC&DB recruit and fill up all the missing positions affecting vote	Relevant communications have been made to Ministry of public service and Ministry of Finance to bridge the funding gap of wage recurrent and nonwage recurrent.	Failure to fully fund the operationalized organo structure since 2005.

### **QUARTER 1: Highlights of Vote Performance**

Planned Actions:	Actual Actions:	Reasons for Variation
performance.		
- Develop and submit to the Ministry of Finance Planning and Economic Development (MOFPED) a request to consider funding the institution's infrastructure; including government farms, restocking, procurement of vehicles, farm machinery, etc.	A five year project proposal (Animal Genetics Improvement Project (AGIP)) worth 36 million USD has been developed and ready for submission to Ministry of Finance in order to undertake capital development activities in nature and they are key in in yielding the desired outputs.	Lack of capital development fund

### V3: Details of Releases and Expenditure

This section provides a comprehensive summary of the outputs delivered by the Vote and further details of Vote expenditures by Vote Function and Expenditure Item.

Table V3.1: GoU Releases and Expenditure by Output\*

Billion Uganda Shillings	Approved Budget	Released	Spent	% GoU Budget Released	% GoU Budget Spent	% GoU Releases Spent
